Amendment to Class D Airspace; Hollywood, FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment modifies Class D surface area airspace at Hollywood, FL. A GPS RWY 9R Standard Instrument Approach Procedure (SIAP) has been developed for North Perry Airport. Additional controlled airspace extending upward from the surface is needed to

accommodate this SIAP and for instrument flight rules (IFR) operations at North Perry Airport. The operating status of the airport will change from VFR to include IFR operations concurrent with publication of this SIAP.

SUPPLEMENTARY INFORMATION:

History

On October 21, 1996, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) by modifying Class D airspace at Hollywood, FL (61 FR 54585). This action would provide adequate Class D airspace for IFR operations at the North Perry Airport.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Class D airspace designations are published in Paragraph 5000 of FAA Order 7400.9D, dated September 4, 1996, and effective September 16, 1996, which is incorporated by reference in 14 CFR 71.1. The Class D airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) modifies Class D airspace at Hollywood, FL. A GPS RWY 9R SIAP has been developed for North Perry Airport. Additional controlled airspace extending upward from the surface is needed to accommodate this SIAP and for instrument flight rules (IFR) operations at North Perry Airport. The operating status of the airport will change from VFR to include IFR operations concurrent with publication of this SIAP.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44

FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
