SUPPLEMENTARY INFORMATION:

Description

The energy information collection submitted to OMB for review contains:

1. *Collection of Information:* FERC Form No. 423, "Monthly Report of Cost and Quality of Fuels for Electric Plants".

2. *Sponsor:* Federal Energy Regulatory Commission.

3. *Control No.:* 1902-0024. The Commission is now requesting that OMB approve a three year extension of these mandatory collection requirements.

4. *Necessity of Collection of Information:* Submission of the information is necessary to enable the Commission to carry out its responsibilities in implementing provisions of the Federal Power Act (FPA) as amended by the Public Utility Regulatory Policies Act (PURPA). The Commission uses the information reported on FERC Form No. 423 to conduct fuel reviews under Section 205 (a) and (e) of the FPA, and to prepare expert testimony in electric utility rate cases filed with the Commission. The Form 423 data provides the only effective means for assessing the potential impact of new developments on the future utility fuel supply patterns. The Commission's staff compare delivered fuel costs for utilities receiving like fuels of similar quality; detect consistently high cost patterns or irregularities indicative of possible uneconomic fuel purchase practices; evaluate the economic effect of unusual fuel purchases practices, such as buying fuel from affiliate fuel sources, as opposed to selecting buyers by competitive bids, and investigate a broad range of fuel costs and fuel purchase practice issues raised in contested rate proceedings.

5. *Respondent Description:* The respondent universe currently comprises approximately 230 public utilities.

6. *Estimated Burden:* 17,112 total burden hours, 228 respondents, 713 responses annually, 2.0 hours per response (average).

Statutory Authority: Section 205, of the Federal Power Act, as amended by Section 208 of the Public Utility Regulatory Policies Act. (49 Stat. 851; 16 U.S.C. 824d).

Lois D. Cashell,

Secretary.
