The National Oceanic and Atmospheric Administration Coastal Services Coastal Services Center is a coastal resource advisory center that draws on the expertise of NOAA and its partners to address critical coastal resource issues. Established in 1994, in Charlestown, South Carolina, the Center's mission is to identify, develop, and facilitate the use of technologies and information that support sustainable use and management of coastal resources. The Coastal Services Center bridges the gap between coastal scientists and resource managers by bringing Center staff, technologies, and outside partner expertise to bear on national problems related to coastal ecosystems and economies. The Center focuses primarily on issues of resource management, land use impacts, and habitat loss as well as coastal hazards and cumulative secondary impacts of coastal development. Clients of the Coastal Services Center include coastal resource managers, policy makers, scientists, environmental organizations, coastal and marine science educators, and private business people. The Center delivers information to the coastal resource community through advisory services, Internet World Wide Web service, information bases, summary reports, training workshops, short courses, conferences, seminars, fact sheets and publications.

The Graduate School of Oceanography of the University of Rhode Island is one of the largest and most widely known graduate schools of oceanography in the United States. It has joined with NOAA as a partner in establishing a national coastal data network because it has particular strengths in coastal oceanography and in distributed ocean data systems, has one of the largest marine science libraries in the world, and is the location of the Sea Grant Depository. The University has been a national Sea Grant College since 1971, and in 1989 it was designated a NOAA Center of Excellence in coastal marine science.
