

counties. Outlying areas economic census statistics serve to benchmark estimates of net income and gross product, and provide essential information for government (Federal and local), business, and the general public. The 1997 Economic Census of the Outlying Areas will cover the following sectors: retail and wholesale trades, certain services industries, construction, and manufactures. The information collected in the 1997 Economic Census of the Outlying Areas will produce basic statistics by kind of business for a number of establishments, sales, payroll, and employment. It also will yield a variety of industry-specific statistics, including value of shipments, sales by commodity and merchandise lines, and number of hotel rooms. The 1997 Economic Census of the Outlying Areas will be conducted using mailout/mailback procedures. As in the 1992 census, only one form covering all economic activity within the scope of the census is used for each area. Since administrative records for the outlying areas sometimes have classification deficiencies, the use of one form eliminates time spent by the respondent requesting a sector-appropriate form.
