Corps of Engineers

Department of the Army

Intent to Prepare a Draft Environmental Impact Statement (DEIS) for the Dade County Erosion Control and Hurricane Protection Project, Project Modification at Sunny Isles

AGENCY: U.S. Army Corps of Engineers, Department of Defense.

ACTION: Notice of intent.

SUMMARY: The Jacksonville District, U.S. Army Corps of Engineers intends to prepare a Draft Environmental Impact Statement for the Dade County Erosion Control and Hurricane Protection Project, Project Modification at Sunny Isles. The study is a cooperative effort between the U.S. Army Corps of Engineers and the Dade County Department of Environmental Resources Management (DERM) which is also a cooperating agency for this DEIS.

FOR FURTHER INFORMATION CONTACT: Kenneth Dugger, 904-232-1686, Environmental Branch, Planning Division, P.O. Box 4970, Jacksonville, Florida 32232-0019.

SUPPLEMENTARY INFORMATION: The Beach Erosion Control and Hurricane Protection (BEC & HP) Project for Dade County, Florida was authorized by the Flood Control Act of 1968. The Supplemental Appropriations Act of 1985 and the Water Resources Development Act of 1986 (Public Law 99-662) provided authority for extending the northern limit of the authorized project to include the construction of a protective beach along the 2.5 mile reach of shoreline north of Haulover Beach Park (Sunny Isles) and for periodic nourishment of the new beach.

Beach fill placed along the northern portion of Sunny Isles rapidly erodes due to spreading (end) losses. Following each beach fill placement, a large discontinuity in berm widths exists at the Sunny Isles/Golden Beach city limit. Material from the wide post-nourishment Sunny Isles shoreline diffuses rapidly northward into Golden Beach, which is offset approximately 150 feet further landward immediately following beach fill placement.

To resolve the problem of end losses and to increase storm protection along the Sunny Isles coastline, a combination of interacting and interdependent shore protection measures have been studied. The proposed action consists of construction of a 120 foot wide advance maintenance berm (along Sunny Isles Beach), a 1500 foot beach fill transition (offshore Golden Beach), and two 400 ft
