**Postponement of Preliminary Determination**

We have determined that the respondent parties to this proceeding are cooperating, thus far, in this investigation. We also have determined that this case is extraordinarily complicated because of the novel legal and methodological issues in this investigation and that additional time is necessary to make the preliminary determination. In particular, the Department must consider novel questions regarding the appropriate date of sale, differences in quantity adjustments, and affiliation. Therefore, pursuant to section 733(c)(1)(B) of the Act, as amended, we are postponing the date of the preliminary determination as to whether sales of open-end spun rayon singles yarn from Austria have been made at less than fair value until not later than March 18, 1997.

This notice is published pursuant to section 733(c)(2) of the Act, and 19 CFR 353.15(d).

Dated: January 15, 1997.

**SUPPLEMENTARY INFORMATION:****I. Abstract**

The Federal Fisheries Logbook Program administered by the Southwest Region, NMFS, is the principal mechanism for monitoring the extent and nature of fishing in the pelagic longline, crustacean, bottomfish and precious corals fisheries in the western Pacific region. These fisheries are regulated under fishery management plans prepared by the Western Pacific Fishery Management Council and approved by the Secretary of Commerce. Persons who have permits to participate in these fisheries must maintain and provide to the Southwest Regional Administrator, NMFS, data concerning catch, effort, results of experimental fishing, or other records. These data are needed to ensure the ability to determine the effects of the fishery on the fish stocks, determine the economic and social values associated with the fisheries, evaluate the effectiveness of management and the impacts of potential changes in management, and enforce the regulations governing the fisheries.
