**SUPPLEMENTARY INFORMATION:**

Electronic Availability: Electronic copies of the ICR are available from the EPA Public Access gopher (gopher.epa.gov) at the Environmental Sub-Set entry for this document under "Rules and Regulations."

**I. Information Collection Request**

EPA is seeking comments on the following Information Collection Request (ICR).

Title: Recordkeeping Requirements for Certified Applicators Using 1080 Collars for Livestock Protection (ICR No. 1249.05; OMB No. 2070-0074). Expiration date: April 30, 1997.

Affected entities: Parties affected by this information collection are registrants of 1080 collars, the state lead agencies of participating states, and certified pesticide applicators using the 1080 collars for livestock protection.

Abstract: As a condition of the Sodium Monofluoroacetate (Compound 1080) registration, EPA has required submission of annual reports monitoring use of all Livestock Protection Collar products. This ICR is a recordkeeping activity in which respondents keep records of: (a) Number of collars purchased; (b) number of collars placed on livestock; (c) number of collars punctured or ruptured; (d) apparent cause of puncture or rupture; (e) number of collars lost or unrecovered; (f) number of collars in use and in storage; and (g) location and species data on each animal poisoned as an apparent result of the toxic collar. As a condition of registration, EPA has required submission of annual reports monitoring use of all Livestock Protection Collar products as required by a 1982 court decision.

Burden statement: The annual respondent burden for the 1080 Livestock Collar Program is estimated to average 32 hours per certified applicator, 77 hours per state, and 9

hours per registrant participating in the program, including time for: Planning activities; creating information; gathering information; processing, compiling, and reviewing information for accuracy; recording, disclosing or displaying the information; and storing, filing, and maintaining the data. Third party notification is included in this ICR as the applicators are reporting to state lead agencies.

The entities affected include small business, however, the degree of imposition that these recordkeeping and reporting requirements impose on such individuals is minimal. The main purpose of the recordkeeping requirements is to promote responsible use and handling, and the main purpose for requiring monitoring reports is to establish a process through which it is mandatory to inform the EPA of the results of collar use.

Any Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are contained in 40 CFR part 9.

**II. Request for Comments**

EPA solicits comments to:

- (i) Evaluate whether the proposed collections of information described above are necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.
- (ii) Evaluate the accuracy of the agency's estimates of the burdens of the proposed collections of information.
- (iii) Enhance the quality, utility, and clarity of the information to be collected.
- (iv) Minimize the burden of the collections of information on those who are to respond, including through the use of appropriate automated or electronic collection technologies or other forms of information technology, e.g., permitting electronic submission of responses.

**III. Public Record**

A record has been established for this action under docket number "OPP-00206" (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The public record is located in Rm. 1132 of the Public Response and Program Resources Branch, Field Operations Division

(7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments can be sent directly to EPA at:

opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this action, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in writing. The official record is the paper record maintained at the address in ADDRESSES at the beginning of this document.

**SUPPLEMENTARY INFORMATION:**

## I. Introduction

Section 6(f)(1) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, provides that a pesticide registrant may, at any time, request that any of its pesticide registrations be cancelled. The Act

further provides that EPA must publish a notice of receipt of any such request in the Federal Register before acting on the request.

## II. Intent to Cancel

This Notice announces receipt by the Agency of requests to cancel some 49

pesticide products registered under section 3 or 24(c) of FIFRA. These registrations are listed in sequence by registration number (or company number and 24(c) number) in the following Table 1.

III. Loss of Active Ingredients

Unless the requests for cancellation are withdrawn, one pesticide active ingredient will no longer appear in any registered products. Those who are concerned about the potential loss of this active ingredient for pesticidal use are encouraged to work directly with the registrants to explore the possibility of withdrawing their request for cancellation. The active ingredient is listed in the following Table 3, with the EPA Company and CAS Number.

#### IV. Procedures for Withdrawal of Request

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to James A. Hollins, at the address given above, postmarked before July 21, 1997. This written withdrawal of the request for cancellation will apply only to the applicable 6(f)(1) request listed in this notice. If the product(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling. The withdrawal request must also include a commitment to pay any reregistration fees due, and to fulfill any applicable unsatisfied data requirements.

#### V. Provisions for Disposition of Existing Stocks

The effective date of cancellation will be the date of the cancellation order. The orders effecting these requested cancellations will generally permit a registrant to sell or distribute existing stocks for 1 year after the date the cancellation request was received. This policy is in accordance with the Agency's statement of policy as prescribed in Federal Register (56 FR 29362) June 26, 1991; [FRL 3846-4]. Exceptions to this general rule will be made if a product poses a risk concern, or is in noncompliance with reregistration requirements, or is subject to a data call-in. In all cases, product-specific disposition dates will be given in the cancellation orders.

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation action. Unless the provisions of an earlier order apply, existing stocks already in the hands of dealers or users can be distributed, sold or used legally until they are exhausted, provided that such further sale and use comply with the EPA-approved label and labeling of the affected product(s). Exceptions to these general rules will be made in specific cases when more stringent restrictions on sale, distribution, or use of the products or their ingredients have

already been imposed, as in Special Review actions, or where the Agency has identified significant potential risk concerns associated with a particular chemical.
