

the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for relicensing the Abbeville Hydroelectric Project, located in Abbeville and Anderson Counties, South Carolina, and has prepared a Draft Environmental Assessment (DEA) for the project. In the DEA, the Commission's staff has analyzed the potential environmental impacts of licensing the existing project and has concluded that issuing a license for the project, with appropriate environmental projection measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the DEA are available for review in the Public Reference Branch, Room 2-A, of the Commission's offices at 888 First Street, N.E., Washington, D.C. 20426.

Any comments should be filed within 30 days from the date of this notice and should be addressed to Lois D. Cashell, Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Room 1-A, Washington, D.C. 20426. Please affix "Abbeville Hydroelectric Project No. 11286" to all comments. I. Information Collection Request

EPA is seeking comments on the following Information Collection Request (ICR).

Title: Recordkeeping Requirements for Certified Applicators Using 1080 Collars for Livestock Protection (ICR No. 1249.05; OMB No. 2070-0074). Expiration date: April 30, 1997.

Affected entities: Parties affected by this information collection are registrants of 1080 collars, the state lead agencies of participating states, and certified pesticide applicators using the 1080 collars for livestock protection.

Abstract: As a condition of the Sodium Monofluoroacetate (Compound 1080) registration, EPA has required submission of annual reports monitoring use of all Livestock Protection Collar products. This ICR is a recordkeeping activity in which respondents keep records of: (a) Number of collars purchased; (b) number of collars placed on livestock; (c) number of collars punctured or ruptured; (d) apparent cause of puncture or rupture; (e) number of collars lost or unrecovered; (f) number of collars in use and in storage; and (g) location and species data on each animal poisoned as an apparent result of the toxic collar. As a condition of registration, EPA has required submission of annual reports monitoring use of all Livestock Protection Collar products as required by a 1982 court decision.

Burden statement: The annual respondent burden for the 1080 Livestock Collar Program is estimated to average 32 hours per certified applicator, 77 hours per state, and 9

hours per registrant participating in the program, including time for: Planning activities; creating information; gathering information; processing, compiling, and reviewing information for accuracy; recording, disclosing or displaying the information; and storing, filing, and maintaining the data. Third party notification is included in this ICR as the applicators are reporting to state lead agencies.

The entities affected include small business, however, the degree of imposition that these recordkeeping and reporting requirements impose on such individuals is minimal. The main purpose of the recordkeeping requirements is to promote responsible use and handling, and the main purpose for requiring monitoring reports is to establish a process through which it is mandatory to inform the EPA of the results of collar use.

Any Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are contained in 40 CFR part 9.

II. Request for Comments

EPA solicits comments to:

(i) Evaluate whether the proposed collections of information described above are necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.

(ii) Evaluate the accuracy of the agency's estimates of the burdens of the proposed collections of information.

(iii) Enhance the quality, utility, and clarity of the information to be collected.

(iv) Minimize the burden of the collections of information on those who are to respond, including through the use of appropriate automated or electronic collection technologies or other forms of information technology, e.g., permitting electronic submission of responses.

III. Public Record

A record has been established for this action under docket number "OPP-00206" (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.
