Resource Management Plan for the Book Cliffs Conservation Initiative Area, UT
AGENCY: Bureau of Land Management, Interior.
ACTION: Notice of Intent to prepare a Coordinated Resource Management Plan/Environmental Impact Statement and Notice of Intent to amend the Book Cliffs Resource Management Plan.
SUMMARY: This notice is intended to inform the public of an intent to prepare a Coordinated Resource Management Plan/Environmental Impact Statement (CRMP/EIS) that addresses future

management of lands within the Book Cliffs planning area, including the lands acquired by the Bureau of Land Management, within the Book Cliffs area of the Vernal District for the purpose of amending the Book Cliffs Resource Management Plan (RMP). Public comment will be actively solicited throughout the CRMP/EIS and amendment development processes.
SUPPLEMENTARY INFORMATION: In 1993, a cooperative effort was undertaken by the Utah Division of Wildlife Resources (UDWR), The Nature Conservancy (TNC), the Rocky Mountain Elk Foundation (RMEF), and the Bureau of Land Management (BLM). The objective of this cooperative effort was to take advantage of existing opportunities to create a balanced approach to the management of unique natural resources within the upper portion of the East Tavaputs Plateau, in southeastern Uintah County, Utah. The cooperative effort dealt with that portion of the Book Cliffs within the area between the Uintah-Ouray Indian Reservation trust lands to the west and the Utah-Colorado state line to the east, an area encompassing roughly 455,000 acres.
 In 1993 and 1994, two private ranches then on the market within the area, were acquired by The Nature Conservancy (TNC) and the Rocky Mountain Elk Foundation (RMEF) with the intent of vesting the title to either the State of Utah or the United States. In 1994, the BLM was vested with title to 5,129 acres, about 53%, of these acquired lands. As public lands administered by the Bureau of Land Management, future management of these lands must be developed and incorporated into the existing Book Cliffs RMP. The Coordinated Resource Management Plan (CRMP) will developed by the BLM in concert with the UDWR, other State and Federal agencies, stakeholders, key interest groups, local government entities, and the general public.
 At this time general planning issues to be addressed and certain assumptions to be presented include:

Assumptions	Concerns
<ul style="list-style-type: none"> • There will be a continued demand and competition for available forage by livestock, wildlife, and in some areas, wild horses. • Recreational use will continue to increase. 	How should forage be allocated between livestock, wildlife, and wild horses while achieving watershed and riparian goals?
<ul style="list-style-type: none"> • There is a need to improve the overall health of the land. 	What mix and level of recreational use can occur while maintaining the area's "Frontier Mystique"? What will be the cumulative impact of resource uses (grazing, energy, and mineral development, recreation, related vehicle access, etc.) on desired condition of vegetative communities in critical habitats such as canyon bottoms, riparian areas, and crucial/critical big game ranges?
<ul style="list-style-type: none"> • Health, diverse wildlife populations desired. 	What are the impacts upon current land uses such as livestock and mineral development as consideration is given for establishment of other native species such as Rocky Mountain bighorn sheep, moose, bison, sharptail grouse, wild turkey, and Colorado River Cutthroat Trout, and other fisheries?
