

1994. The Chesapeake Bay area (Maryland, Virginia, and the Potomac River) accounted for 52 percent of the 1995 commercial landings, while Massachusetts and North Carolina accounted for 21 percent and 9 percent respectively.

The recreational catch in 1995 was an estimated 9.6 million striped bass, of which 1.1 million were harvested; the remaining 8.5 million were released. The estimated weight of the recreational harvest was 12.1 million lb (5,492.4 mt).

Juvenile production in 1995 was lower than in 1994 but remained at levels above the long term averages for New York, Maryland, North Carolina, and Virginia. The Delaware juvenile production index of 7.6 was the highest in the time series for that index, which began in 1980.

Information from sampling the population of striped bass shows an increased relative abundance from recent year classes. Copies of the survey are available upon request (see ADDRESSES).
