## NUCLEAR REGULATORY COMMISSION

### Agency Information Collection Activities: Submission for OMB Review; Comment Request

**AGENCY:** U.S. Nuclear Regulatory Commission (NRC).

**ACTION:** Notice of the OMB review of information collection and solicitation of public comment.

**SUMMARY:** The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

1. Type of submission, new, revision, or extension: Revision
2. The title of the information collection: Application for License to Export Nuclear Equipment and Material
3. The form number if applicable: NRC Form 7
4. How often the collection is required: On occasion; For each separate request for a specific export license and for exports of incidental radioactive material using existing general licenses.
5. Who will be required or asked to report: Any person in the U.S. who wishes to export: (a) Nuclear material and equipment subject to the requirements of a specific license; (b) radioactive waste subject to the requirements of a specific license; and (c) incidental radioactive material that is a contaminant of shipments of more than 100 kilograms of non-waste material using existing NRC general licenses.
6. An estimate of the number of responses: 63
7. The estimated number of annual respondents: 63
8. An estimate of the total number of hours needed annually to complete the requirement or request: 150 hours (2.4 hours per response)

9. An indication of whether Section 3507(d), Public Law 104-13 applies: Not applicable.

10. Abstract: Any person in the U.S. wishing to export nuclear material and equipment requiring a specific authorization or radioactive waste requiring a specific authorization ordinarily should file an application for a license on NRC Form 7, except that certain submittals should be filed by letter. The application will be reviewed by the NRC and by the Executive Branch, and if applicable statutory, regulatory, and policy considerations are satisfied, the NRC will issue a license authorizing the export.

A completed NRC Form 7 must also be filed by any person in the U.S. wishing to use existing NRC general licenses for the export of incidental radioactive material before the export takes place (if the total amount of the shipment containing the incidental radioactive material exceeds 100 kilograms). The form is reviewed by the NRC to ensure that the NRC is informed before the fact of these kinds of shipments and to allow NRC to inform other interested parties, as appropriate, including import control authorities in interested foreign countries.

A copy of the submittal may be viewed free of charge at the NRC Public Document Room, 2120 L Street, NW (Lower Level), Washington, DC. Members of the public who are in the Washington, DC, area can access the submittal via modem on the Public Document Room Bulletin Board (NRC's Advanced Copy Document Library) NRC subsystem at FedWorld, 703-321-3339. Members of the public who are located outside of the Washington, DC, area can dial FedWorld, 1-800-303-9672, or use the FedWorld Internet address: [fedworld.gov](http://fedworld.gov) (Telnet). The document will be available on the bulletin board for 30 days after the signature date of this notice. If assistance is needed in accessing the document, please contact the FedWorld help desk at 703-487-4608. Additional assistance in locating the document is available from the NRC Public Document Room, nationally at 1-800-397-4209, or within the Washington, DC, area at 202-634-3273.

Comments and questions should be directed to the OMB reviewer by March 3, 1997: Edward Michlovich, Office of Information and Regulatory Affairs (3150-0027), NEOB-10202, Office of Management and Budget, Washington, DC 20503.

Comments can also be submitted by telephone at (202) 395-3084.

The NRC Clearance Officer is Brenda Jo. Shelton, (301) 415-7233.

Dated at Rockville, Maryland, this 24th day of January 1997.

For the Nuclear Regulatory Commission.

Gerald F. Cranford,

*Designated Senior Official for Information Resources Management.*

[Docket Nos. 50-317 and 50-318]

### Baltimore Gas and Electric Company; Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License Nos. DPR-53 and DPR-69 issued to the Baltimore Gas and Electric Company (BGE or the licensee) for operation of the Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, located in Calvert County, Maryland.

The proposed amendments, requested by the licensee in a letter dated December 4, 1996, would represent a full conversion from the current Technical Specifications (TSs) to a set of TS based on NUREG-1432, Revision 1, "Standard Technical Specifications, Combustion Engineering Plants" dated April 1995. NUREG-1432 has been developed through working groups composed of both NRC staff members and industry representative and has been endorsed by the staff as part of an industry-wide initiative to standardize and improve TS. As part of this submittal, the licensee has applied the criteria contained in the Commission's "Final Policy Statement on Technical Specification Improvements for Nuclear Power Reactors (final policy statement)," published in the Federal Register on July 22, 1993 (58 FR 39132), to the current Calvert Cliffs TSs, and, using NUREG-1432 as a basis, developed a proposed set of improved TSs for Calvert Cliffs. The criteria in the final policy statement were subsequently added to 10 CFR 50.36, "Technical Specifications," in a rule change which was published in the Federal Register on July 19, 1995 (60 FR 36953) and became effective on August 18, 1995.

The licensee has categorized the proposed changes to the existing TSs into five general groupings. These groupings are characterized as administrative changes, relocated changes, more restrictive changes, less restrictive changes, and removed detail.

Administrative changes are those that involve restructuring, renumbering,
