

Weyerhaeuser has requested that flexibility be granted in meeting reporting and testing requirements associated with a number of regulatory programs as well as some of the requirements of the Clean Air Act and the proposed EPA cluster rules. Emission and discharge testing will continue. Weyerhaeuser proposed, however, that routine reporting of such testing be replaced with mid-year and end-of-year compliance reports. All records of testing and results will be available upon request. Reporting not covered by the agreement will continue. Enforcement mechanisms now available to the State and EPA will remain in place.

Weyerhaeuser has also requested a dual emission cap system which would give the facility the flexibility to make process changes or add equipment while providing a strong incentive to maintain or lower overall facility air emissions. The flexibility of the dual cap system should allow the facility to fully utilize several previously permitted units without triggering permitting requirements for otherwise minor changes in the plant.

When the rule requiring the use of maximum available control technology (MACT) for the pulp and paper industry is promulgated (this is currently proposed as part of EPA's cluster rule), the parties to the FPA will perform an assessment to quantify the reductions in hazardous air pollutants required of the facility under the rule. The FPA contemplates that Weyerhaeuser will be given the flexibility to demonstrate that the required reductions of hazardous air pollutants can be achieved through the use of innovative pollution prevention and engineering approaches instead of prescribed end-of-pipe controls. Weyerhaeuser would be permitted to use existing voluntary actions at non-MACT, non-regulated emission sources as well as future reductions at non-MACT sources for compliance purposes. Because the MACT rule is not yet final, there is some uncertainty regarding the type of flexibility that Weyerhaeuser will request. However, the FPA contemplates additional or alternative enforceable mechanisms as appropriate, and commits the parties to engage in good faith discussions of the necessity, feasibility, nature, and form of these mechanisms.

After careful consideration of the benefits offered by the project, balanced against the flexibility granted to Weyerhaeuser, EPA believes that the actions described in the FPA meet the criteria for an XL project.

Availability of Reregistration Eligibility Decision Documents for Comment; Certain Chemicals

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability of Reregistration Eligibility Decision documents; opening of public comment period.

SUMMARY: This notice announces the availability of the Reregistration Eligibility Decision (RED) documents for the active ingredients Alkyl Imidazolines, Amitraz, Amitrole, Ancymidol, Bronopol, Chlorhexidine diacetate, Chlorpropham, Coumaphos, Cryolite, Desmedipham, Dibromodicyanobutane, Dimethoxane, Hydroxyethyl octyl sulfide, Hydroxypropylmethanethiosulfonate, Methyloxazolidine, Mitin-FF, Norflurazon, O-benzyl-p-chlorophenol and salts, Prometryn, Propamocarb hydrochloride, Starlicide, Tetrachlorvinphos, and Trifluralin. This notice starts a 60-day public comment period. The REDs for the chemicals listed above are the Agency's formal regulatory assessments of the health and environmental data base of the subject chemicals and present the Agency's determination regarding which pesticidal uses are eligible for reregistration.

Please note that these REDs were finalized and signed prior to August 3,

1996. On that date, the Food Quality Protection Act of 1996 ("FQPA") became effective, amending portions of both the pesticide law (FIFRA) and the food and drug law (FFDCA). These REDs don't address any issues raised by FQPA, and any tolerance-related statements in the RED did not take into account any changes in tolerance assessment procedures required under FQPA. To the extent that these REDs indicate that a change in any tolerance is necessary, that determination will be reassessed by the Agency under the standards set forth in FQPA before a proposed tolerance is issued. To the extent that the RED does not indicate that a change in the tolerance is necessary, that tolerance, too, will be reassessed in the future pursuant to the requirements of FQPA.

DATES: Written comments on these decisions must be submitted by April 1, 1997.

ADDRESSES: Three copies of comments identified with the docket number "OPP-34099" and the case number (noted below), should be submitted to: By mail: OPP Pesticide Docket, Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.
