SUPPLEMENTARY INFORMATION

I. Abstract

The Bureau of the Census developed the ICM approach for measuring coverage during the decennial census. The Independent Listing will obtain a complete housing unit inventory of all addresses within the 1998 ICM Dress Rehearsal sites just before the 1998 Dress Rehearsal commences. Currently, we are planning on using two Independent Listing forms, DX-1302 and DX-1302A. The DX-1302 will contain experimental questions designed to enhance our address listing procedures. We will compare the results using Form DX-1302 with those from a control listing form that did not contain the experimental questions, Form DX-1302A, to see if the experimental questions improved our coverage of addresses. The Independent Listing will undergo a quality assurance operation to ensure that the work performed is of acceptable quality and to verify that the correct block was visited.

The listings will be matched to the census list of addresses; the unmatched cases will be sent to the field for reconciliation using the Housing Unit Follow-up Form, DX-1303. For quality assurance purposes, a sample of the follow-up cases will be verified to ensure that the follow-up enumerators visit the block clusters, resolve the cases, and correctly follow procedures. The resultant address listing will be used in the next phase of the ICM, the ICM Person Interview. The forms and procedures to be used in this phase of the ICM in the 1998 Dress Rehearsal will be included in a separate submission.

II. Method of Collection

Person to person interview.
