

and, in general, to protect investors and the public interest.

Specifically, the Exchange proposed that minimum time periods before opening or reopening a stock be compressed from 15 to 10 minutes after the first indication; and to 5 minutes after the last indication, regardless of whether it overlaps the prior indication, provided that a minimum of 10 minutes elapse between the first indication and the opening or reopening of a stock. For example, if only 3 minutes had elapsed from the time of the first indication to the second indication, the minimum waiting period after the second indication would be 7 minutes.

The Commission agrees with the Exchange that due to increases in the speed of communications, relevant market information can be disseminated and responded to very quickly. The Commission finds reasonable the Exchange's determination that the proposed rule change will allow the opening or reopening of a stock in more expeditious fashion while still providing sufficient time for appropriate pricing of orders. The Commission finds that in the rule change, the Exchange has made a reasonable determination that balances the preservation of the price discovery process while providing timely opportunities for investors to participate in the market. Exchange staff has represented that the change in the timing of tape indications is consistent with Intermarket Trading System re-opening procedures.⁴

IV. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,⁵ that the proposed rule change (File No. SR-NYSE-96-32) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority,⁶

Margaret H. McFarland,

Deputy Secretary.
