

Protection Agency pursuant to the OPA, the agencies have divided their respective responsibilities for oil spill prevention and response according to the definition of "coast line" contained in the Submerged Lands Act, 43 U.S.C. 1301(c) (59 FR 9494-9495). Nothing herein is intended to affect the implementation or administration of that MOU.

VI. Modification

Either party to this agreement may propose modifications by submitting them in writing to the head of the other Department. No modification may be adopted except with the consent of both parties. Both parties shall indicate their consent to or disagreement with any proposed modification within 60 days of receipt. Upon the request of either party, representatives of both parties shall meet for the purpose of considering modifications to this agreement.

VII. Termination

This MOU may be terminated by either party upon 60-day written notice to the other party.

VIII. Administration

This MOU will be administered by DOI's Minerals Management Service and DOT's Research and Special Programs Administration or such successor agencies as may be designated by the respective Secretaries.

IX. Effective Date

This MOU is effective upon acceptance by both parties as indicated by the signatures below.

Dated: December 10, 1996.
Department of the Interior.
Bruce Babbitt,
Secretary.

Dated: December 10, 1996.
Department of Transportation
Federico Peña,
Secretary.

BILLING CODE 4310-70-F

Notice of Inventory Completion for Native American Human Remains and Associated Funerary Objects from near Yerington, Nevada, in the Possession of the Nevada State Museum, Carson City, NV

AGENCY: National Park Service, Interior.
ACTION: Notice.

Notice is hereby given in accordance with provisions of the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003 (d), of the completion of an inventory of human remains and associated funerary objects near Yerington, Nevada, in the possession of the Nevada State Museum, Carson City, NV.

A detailed assessment of the human remains and associated funerary objects was made by the Nevada State Museum professional staff in consultation with representatives of the Yerington Paiute Tribe.

Before 1970, human remains representing one individual were collected by an unknown person and delivered to the Nevada State Museum. "Yerington" was written on the box the human remains were delivered in. No known individual was identified. No associated funerary objects are present.

Morphological evidence indicates this individual is Native American based on cranial shape and dental traits. One tooth in the cranium shows pre-contact type wear and lingual tilting, supporting precontact but otherwise unknown age. Historic and ethnographic evidence indicates only the Yerington Paiute Tribe has occupied the Yerington area in historic times, and no non-Paiute precontact cultures have been identified within the Yerington area. Oral tradition presented by representatives of the Yerington Paiute Tribe supports this conclusion.

In 1984, human remains representing one individual were recovered during water line construction by the City of Yerington, Nevada. No known individual was identified. The 759 associated funerary objects include: 12 white buttons, one blue button, and 745 turquoise-colored, blue and black glass trade beads.

Morphological evidence indicates this individual is Native American based on cranial shape and dental traits. The associated funerary objects date this burial to after 1840. The manner of internment and the presence of glass beads and clothing buttons are consistent with Northern Paiute burials in this region. Consultation evidence indicates the Yerington Paiute Tribe has occupied this area since precontact times. Historic and ethnographic evidence indicates only the Yerington Paiute Tribe has occupied the Yerington area in historic times, and no non-Paiute precontact cultures have been identified within the Yerington area.

In 1987, human remains representing one individual were recovered from Smith Valley, Lyon County, NV, by the Nevada Division of Investigations and turned over to the Nevada State Museum when it was determined to be a Native American individual. No known individual was identified. No associated funerary objects are present.

Historic and ethnographic evidence indicates only the Yerington Paiute Tribe has occupied the Yerington area in historic times, and no non-Paiute precontact cultures have been identified within the Yerington area. Oral tradition presented by representatives of the Yerington Paiute Tribe support this conclusion.

In May of 1990, human remains representing one individual was found by a private citizen near Yerington, Nevada, and reported to the Lyon County Sheriff's Office. No known individual was identified. The eight associated funerary objects include: denim jeans, a wool army jacket, a braided hackamore bosal, metal rings and leather representing a saddle, and
