

Controlled airspace extending upward from 700 to 1200 feet above ground level (AGL) is needed to contain aircraft executing the approach. The intended affect of this action is to provide segregation of aircraft using instrument approach procedures in instrument conditions from other aircraft operating in visual weather conditions.

EFFECTIVE DATE: 0901 UTC, May 22, 1997.

FOR FURTHER INFORMATION CONTACT: John A. Clayborn, Air Traffic Division, Operational Branch, AGL-530, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (847) 294-7568.

SUPPLEMENTARY INFORMATION:

History

On Friday, November 29, 1996, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to establish Class E airspace at New Lisbon (61 FR 60655). The proposal was to add controlled airspace extending upward from 700 to 1200 feet AGL to contain Instrument Flight Rules (IFR) operations in controlled airspace during portions of the terminal operation and while transiting between the enroute and terminal environments.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Class E airspace designations for areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9D dated September 4, 1996, and effective September 16, 1996, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) establishes Class E airspace at New Lisbon, WI to accommodate aircraft executing the GPS Runway 32 SIAP at Mauston-New Lisbon Union Airport. Controlled airspace extending upward from 700 to 1200 feet AGL is needed to contain aircraft executing the approach. The area will be depicted on appropriate aeronautical charts thereby enabling pilots to circumnavigate the area or otherwise comply with IFR procedures.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are

necessary to keep them operationally current. Therefore, this regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389; 14 CFR 11.69.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9D, Airspace Designations and Reporting Points, dated September 4, 1996, and effective September 16, 1996, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

* * * * *

AGL WI E5 New Lisbon, WI [New]

Mauston-New Lisbon Union Airport
(lat. 43°50'17" N, long. 90°08'13" W)

That airspace extending upward from 700 feet above the surface within a 8.8-mile radius of Mauston-New Lisbon Union Airport, excluding that airspace which overlies the Necedah, WI, Class E airspace and the Camp Douglas, WI, Class D and E airspace areas, during the specific dated and times class D airspace is effective.

14 CFR Part 71

[Airspace Docket No. 96-AGL-21]

Modification of Class E Airspace; Monticello, IN, White County Airport

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action modifies Class E airspace at Monticello, IN. A Global Positioning System (GPS) standard instrument approach procedure (SIAP) to Runway 18 and a GPS SIAP to Runway 36 have been developed for White County Airport. Controlled airspace extending upward from 700 to 1200 feet above ground level (AGL) is needed to contain aircraft executing the approach. The intended affect of this action is to provide segregation of aircraft using instrument approach procedures in instrument conditions from other aircraft operating in visual weather conditions.

EFFECTIVE DATE: 0901 UTC, May 22, 1997.

RIN 2120-AA66

Amendment to Time of Designation for Restricted Area R-4305, Lake Superior, MN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule amends the time of designation for Restricted Area 4305 (R-4305), Lake Superior, MN, by reducing the requirement for the issuance of a Notice to Airmen (NOTAM) from 12 hours in advance to 4 hours in advance of activation of the airspace. The U.S. Air Force requested this amendment to permit greater flexibility in scheduling R-4305.

EFFECTIVE DATE: 0901 UTC, May 22, 1997.

FOR FURTHER INFORMATION CONTACT:

Steve Brown, Airspace and Rules Division, ATA-400, Office of Air Traffic Airspace Management, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-8783.

SUPPLEMENTARY INFORMATION:

History

On November 5, 1996, the FAA proposed to amend Title 14 of the Code of Federal Regulations part 73 (14 CFR part 73) to amend the time of designation for R-4305 from the current “Intermittent by NOTAM, 12 hours in advance,” to “Intermittent by NOTAM, 2 hours in advance.” (61 FR 56927). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. However, the FAA determined that 2 hours advance notice did not allow enough time for the NOTAM to be processed and still have adequate lead time for airspace users to become aware of the activation prior to their flights. Therefore, the time of designation will now read: “Intermittent by NOTAM, 4 hours in advance.” The

FAA’s Great Lakes Region coordinated this change with the regional U.S. Air Force representative and, on January 27, 1997, the U.S. Air Force formally accepted the modification to their proposal. Except for editorial changes and the time of designation change from “Intermittent by NOTAM, 2 hours in advance” to “Intermittent by NOTAM, 4 hours in advance,” this amendment is the same as that proposed in the notice. Section 73.43 of part 73 of the Federal Aviation Regulations was republished in FAA Order 7400.8D dated July 11, 1996.

The Rule

This amendment to part 73 of the Federal Aviation Regulations (14 CFR part 73) amends the time of designation for R-4305 from the current “Intermittent by NOTAM, 12 hours in advance,” to “Intermittent by NOTAM, 4 hours in advance.” The current 12-hour in advance NOTAM requirement does not permit the using agency sufficient flexibility to efficiently accomplish its mission in the event of maintenance or weather delays, or other operational factors. This action will not alter the existing boundaries, altitudes, or designated purpose of R-4305.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This action will not affect the existing boundaries, altitudes, or activities conducted in R-4305. There will be no change from current operations and no new air traffic procedures will be necessary as a result of this rule. Therefore, the FAA has determined that this action is not subject to environmental assessments and procedures in accordance with FAA Order 1050.1D, “Policies and Procedures for Considering Environmental Impacts.”
