EPA issued a notice, published in the Federal Register of October 9, 1996 (61 FR 52944; FRL-5397-1), which announced that Stine Microbial Products, 2225 Laredo Trail, Adel, IA 50003, had submitted an application to register the product Blue Circle Liquid Biological Fungicide (File Symbol 63950-A), containing the active ingredient *Burkholderia cepacia* type Wisconsin isolate J82 at 0.6 percent, an active ingredient not included in any previously registered product. The active ingredient concentration was subsequently corrected from 0.6 to 2 percent.

The application was approved on December 24, 1996, as Blue Circle Liquid Biological Fungicide (EPA Registration Number 63950-6), for application to food and nonfood plant and seedling roots.

The Agency has considered all required data on risks associated with the proposed use of *Burkholderia cepacia* type Wisconsin isolate J82, and information on social, economic, and environmental benefits to be derived from use. Specifically, the Agency has considered the nature of the chemical and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that use of *Burkholderia cepacia* type Wisconsin isolate J82 when used in accordance with widespread and commonly recognized practice, will not generally cause unreasonable adverse effects to the environment.

More detailed information on this registration is contained in an EPA Pesticide Fact Sheet on *Burkholderia cepacia* type Wisconsin isolate J82.

A copy of this fact sheet, which provides a summary description of the chemical, use patterns and formulations, science findings, and the Agency's regulatory position and rationale, may be obtained from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161.
