Annual Survey of Manufactures

The Annual Survey of Manufactures collects industry statistics such as total

value of shipments, employment, payroll, workers' hours, capital expenditures, cost of materials consumed, supplemental labor costs, and so forth. This survey, while conducted on a sample basis, covers all manufacturing industries, including data on plants under construction but not yet in operation.

In accordance with the Paperwork Reduction Act, Public Law 104-13, this survey has been approved by the OMB under OMB control number 0607-0449.

#### Survey of Industrial Research and Development

The Survey of Industrial Research and Development measures spending on research and development activities in private U.S. businesses. The Census Bureau collects and compiles this information with funding from the National Science Foundation (NSF). The NSF publishes the results in its publication series. Four data items in the survey provide interim statistics collected in the Census Bureau's Economic Censuses. These items (total company sales, total company employment, total expenditures and Federally-funded expenditures for research and development conducted within the company) are collected on a mandatory basis under the authority of Title 13. Responses to all other data collected for the NSF are voluntary.

In accordance with the Paperwork Reduction Act, Public Law 104-13, this survey has been approved by the OMB under OMB control number 3145-0027.

#### Conclusion

I have, therefore, directed that these annual surveys be conducted for the purpose of collecting the data as described.
