Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents,

*Needs and uses:* The Emergency Broadcast System (EBS) has been changed to the Emergency Alert System (EAS). This change required that all EBS collections/forms to be corrected to reflect the name change. The EAS Activation Report Postcard was developed as part of the EAS planning program. The program is a three agency agreement between the FCC, NOAA National Weather Service, and the Federal Emergency Management Agency (FEMA). The information is needed to maintain accurate records and documentation of broadcast stations and cable systems in compliance with FCC rules, and to enhance and encourage participation in the national, state and local EAS. Any reduction in the frequency of this activity would result in a proportional loss of benefit and would cause a delay in the detection of EAS equipment failures that could cause the loss of national, state and local emergency messages to the public which in turn could cause the loss of life and property.
