The proposed supplement No. 10 to Rate Schedule FERC No. 96, applicable to electric delivery service to NYPA's non-public, economic development customers, and the proposed supplement No. 6 to Rate Schedule FERC No. 92, applicable to electric delivery service to commercial and industrial economic development customers of the County of Westchester Public Utility Service Agency (COWPUSA) or the New York City Public Utility Service (NYCPUS), increase the rates and charges for the service by \$50,000 annually based on the 12-month period ending March 31, 1998.

The proposed increases are a part of a Company-wide general electric rate change application which Con Edison filed to implement rates for the third year of a multi-year rate plan previously approved by the New York Public Service Commission (NYPSC) and which is pending before the NYPSC.

Alaska Power and Telephone Company; Notice of Availability of Environmental Assessment

February 21, 1997.

An environmental assessment (EA) is available for public review. The EA is for an application to amend the Goat Lake Hydroelectric Project. The application is to modify the project by extending the access road to the bottom of the Skagway River Valley, relocating the powerhouse to the west side of the river, extending the transmission line, realigning the penstock route, and deleting the 125-foot-long spillway and burying the siphon. The EA finds that approval of the application would not constitute a major federal action significantly affecting the quality of the human environment. The Goat Lake Project is located on Pitchfork Falls, near the town of Skagway, Alaska.

The EA was written by staff in the Office of Hydropower Licensing, Federal Energy Regulatory Commission. Copies of the EA can be viewed in the Public Reference Branch, Room 1C-1, of

the Commission's offices at 888 First Street, N.E., Washington, D.C. 20426.

Iroquois Gas Transmission System, L.P.; Notice of Availability of the Environmental Assessment for the Proposed Athens Compressor Station Project

The EA was prepared to satisfy the requirements of the National Environmental Policy Act. The staff concludes that approval of the project, with appropriate mitigating measures would not constitute a major Federal action significantly affecting the quality of the human environment.

The EA addresses the construction and operation by Iroquois Gas Transmission System, L.P. (Iroquois) of 9,500 horsepower of compression at the proposed Athens Compressor Station in Greene County, New York.

The purpose of the compressor station is to provide additional firm transportation capacity of up to 30 million cubic feet per day of natural gas to two shippers.

Turlock Irrigation District and Modesto Irrigation District; Notice of Availability of Environmental Assessment

February 21, 1997.

An environmental assessment (EA) is available for public review. The EA is for an application for an amendment of license for the new Don Pedro Project. The amendment of license application concerns changes to project transmission lines, including the addition of a section of existing transmission line within the project boundary. The EA finds that approval of the application would not constitute a major federal action significant affecting the quality of the human environment. The New Don Pedro Project is located in Tuolumne County, California.

The EA was written by staff in the Office of Hydropower Licensing, Federal Energy Regulatory Commission. Copies of the EA are available for review at the Commission's Reference and Information Center, Room 2-A, 888 First Street, NE, Washington, DC 20426. Copies can also be obtained by calling the project manager, Jon Cofrancesco at (202) 219-0079.
