Bureau of Reclamation

Operating Criteria and 1997 Annual Plan of Operations for Glen Canyon Dam

AGENCY: Bureau of Reclamation, Interior.

ACTION: Adoption of operating criteria and 1997 annual plan of operations.

SUMMARY: Pursuant to the Grand Canyon Protection Act of 1992, the Bureau of Reclamation (Reclamation) is required to prepare formal Operating Criteria and an Annual Plan of Operations following completion of an audit by the General Accounting Office (GAO) and the Record of Decision (ROD) on the Operation of Glen Canyon Dam. The GAO audit was completed on October 2, 1996, and the Glen Canyon Dam Operation ROD was signed on October 9, 1996. Draft copies of the proposed Operating Criteria and the 1997 Annual Plan of Operations were distributed to Governors of the Colorado River Basin States, the Upper Colorado River Commission, appropriate Federal agencies, Indian Tribes, representatives

of academic and scientific communities, environmental organizations, the recreation industry, contractors for the purchase of federal power produced at Glen Canyon Dam, and others interested in Colorado River operations.

FOR FURTHER INFORMATION CONTACT: Mr. Bruce Moore, Bureau of Reclamation, 125 South State Street, Room 6107, Salt Lake City, Utah 84138–1102; telephone: 801–524–3702.

SUPPLEMENTARY INFORMATION: The Operating Criteria specify the requirements for an annual report of operations under the Grand Canyon Protection Act, a periodic review of Operating Criteria, and details regarding operational constraints. These constraints include maximum, minimum, and daily fluctuation flow rates, maximum ramp rates, emergency exception criteria, flood frequency reduction measures, habit maintenance flows, and beach/habitat building flows.

The 1997 Annual Plan of Operations reflects the operation of Glen Canyon Dam consistent with the Operating Criteria. Monthly releases are expected to vary between 600,000 acre-feet and 1,500,000 acre-feet and daily fluctuations will likely vary between 6,000 cfs/day and 8,000 cfs/day depending on monthly release volumes. The revised maximum daily flow rate of 25,000 cfs and the maximum upramp rate of 4,000 cfs/hr. will be placed into effect following signing of these documents by the Secretary of the Interior. The following paragraphs contain the final text of the Operating Criteria and the 1997 Plan of Operations for Glen Canyon Dam.

Operating Criteria: These Operating Criteria are promulgated according to section 1804 of Public Law 102–575, the Grand Canyon Protection Act of 1992. They are to control the operation of Glen Canyon Dam, constructed under the authority of the Colorado River Storage Project Act. These Operating Criteria are separate and apart from the Criteria for Coordinated Long-Range Operation of Colorado River Reservoirs prepared according to the Colorado River Basin Project Act of 1968.

1. Annual Report: As required in the Grand Canyon Protection Act, a report shall be prepared and submitted to Congress annually. This report will describe the operation of Glen Canyon Dam for the preceding water year and the expected operation for the upcoming water year. The annual plan of operations shall include such detailed rules and quantities as are required by the Operating Criteria contained herein. It shall provide a detailed explanation of the expected hydrologic conditions for
