Type of Request: Extension of a currently approved collection.

Abstract: As part of the Performance Reporting System, each State agency is required to provide a systematic means of determining the accuracy of household eligibility and measuring the extent to which households receive the food stamp allotment to which they are entitled. The quality control system is designed to provide a basis for determining each State agency's error rates. Quality control data serves as an objective measure of program operations at the State level and is essential to the determination of a State agency's entitlement to an increased Federal share of its administrative costs or liability for sanctions.

To help ensure that quality control data is reliable and unbiased, Section 275.11(a) requires each State agency to

submit a quality control sampling plan to the Food and Consumer Service for approval. The sampling plan is a part of the inclusive State Plan of Operation.
