[Docket Nos. 50-387 and 50-388]**Pennsylvania Power and Light Company; Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Opportunity for a Hearing**

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. NPF-14 and NPF-22 issued to Pennsylvania Power & Light Company (PP&L, the licensee) for operation of the Susquehanna Steam Electric Station, Units 1 and 2, located in Luzerne County, Pennsylvania.

The proposed amendment would change the Technical Specifications (TSs) for the two units to include sections that would define and permit the withdrawal of control rods in OPERATIONAL CONDITIONS 3 and 4, hot shutdown and cold shutdown, respectively, with the reactor mode switch in the REFUEL position. These specific changes had been included in a submittal dated August 1, 1996, which was the conversion to the Improved Technical Specifications (ITS); but in this current application, the specific ITS Sections 3.10.3 and 3.10.4 have been reformatted for incorporation into the current TSs for each unit.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By April 4, 1997, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman
