

LATA to retrieve stored information from, or file information for storage in, information storage facilities of such company that are located in another LATA." Because BOCs were able to provide incidental interLATA services immediately upon enactment of the 1996 Act, they may provide interLATA information services that fall within the scope of section 271(g)(4) without receiving section 271(d) authorization from the Commission. Since section 271(g)(4) services are not among the incidental interLATA services exempted from section 272 separate affiliate requirements, however, they must be provided in compliance with those requirements. To the extent that parties have argued in the record that centralized data storage and retrieval services that fall within section 271(g)(4) either are not interLATA information services, or are not subject to the section 272 separate affiliate requirements, we specifically reject these arguments.
