

information, from the Power Brake working group (to revise the power brake regulations contained in 49 CFR part 232), the Locomotive Engineer Certification working group (to revise the locomotive engineer certification regulations contained in 49 CFR Part 240), and the Tourist and Historic Railroads working group's Steam Standards task force (to revise the steam locomotive inspection and testing standards contained in 49 CFR part 230). The RSAC will also be receiving a report from the locomotive crew safety planning group (evaluating the agency's report to Congress on locomotive crashworthiness and crew working conditions and to assess possible future action).

Finally, the agency will engage in exploratory discussion with the RSAC regarding the following issues, which may be tasked to the RSAC in the future: (1) The dispatcher training task force; (2) the track motor vehicles and self-propelled roadway equipment task force; and (3) AAR Event recorder data survivability progress; and (4) the address of several administrative matters before the RSAC.

Please refer to the notice published in the Federal Register on March 11, 1996 (61 FR 9740) for more information about the RSAC.

Issued in Washington, D.C. on March 4, 1997.

Bruce Fine,

Associate Administrator for Safety.

BILLING CODE 4910-06-P

National Highway Traffic Safety Administration

[Docket No. 74-40; Notice 9]

Insurance Cost Information Regulation

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of text and data for 1997 Insurance Cost Information Booklet.

SUMMARY: This notice provides the 1997 text and data that new car dealers must include in an insurance cost information booklet that they must make available to prospective purchasers, pursuant to 49 CFR 582.4. This information may assist prospective purchasers in comparing differences in passenger vehicle collision loss experience that could affect auto insurance costs.

FOR FURTHER INFORMATION CONTACT: Mr. Orron Kee, Office of Market Incentives, NHTSA, 400 Seventh Street S.W., Washington, DC 20590 (202-366-4936).

SUPPLEMENTARY INFORMATION: Pursuant to section 201(e) of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C. 1941(e), on March 5, 1993, 58 FR 12545, the National Highway Traffic Safety Administration (NHTSA) amended 49 CFR Part 582, Insurance Cost Information Regulation, to require dealers of new automobiles to distribute to prospective customers information that compares differences in insurance costs of different makes and models of passenger cars based on differences in damage susceptibility. On March 17, 1994, NHTSA denied a petition submitted by the National Automobile Dealers Association (NADA) for NHTSA to reconsider Part 582 insofar as it requires new automobile dealers to prepare the requisite number of copies for distribution of the insurance cost information to prospective purchasers. 59 FR 13630. On March 24, 1995, NHTSA published a Final Rule to amend Part 582 in a number of respects. 60 FR 15509.

Pursuant to 49 CFR § 582.4, new automobile dealers are required to make available to prospective purchasers booklets that include this comparative information as well as certain mandatory explanatory text that is set out in section 582.5. Early each year, NHTSA publishes updated annual data in the Notices section of the Federal Register. Booklets reflecting the updated data must be available for distribution to prospective purchasers without charge within 30 days from the date of publication of the data in the Federal Register.

NHTSA has mailed a sample copy of the 1997 booklet to each dealer on the mailing list that the Department of Energy uses to distribute the "Gas Mileage Guide." Dealers will have the responsibility of reproducing a sufficient number of copies of the booklet to assure that they are available for retention by prospective purchasers by April 7, 1997. Dealers who do not receive a copy of the booklet within 15 days of the date of this notice should contact Mr. Orron Kee of NHTSA's Office of Planning and Consumer Programs ((202) 366-0846) to receive a copy of the booklet and to be added to the mailing list.

The required text and data are as follows:

FEBRUARY 1997

COMPARISON OF DIFFERENCES IN INSURANCE COSTS FOR PASSENGER CARS, STATION WAGONS/PASSENGER VANS, PICKUPS AND UTILITY VEHICLES ON THE BASIS OF DAMAGE SUSCEPTIBILITY

The National Highway Traffic Safety Administration (NHTSA) has provided the information in this booklet in compliance with Federal law as an aid to consumers considering the purchase of a new car. The booklet compares differences in insurance costs for different makes and models of passenger cars, station wagons/passenger vans, pickups, and utility vehicles on the basis of damage susceptibility. However, it does not indicate a vehicle's relative safety.

The following table contains the best available information regarding the effect of damage susceptibility on auto insurance premiums. It was taken from data compiled by the Highway Loss Data Institute (HLDI) in its December 1996 *Insurance Collision Report*, and reflects the collision loss experience of passenger cars, utility vehicles, light trucks, and vans sold in the United States in terms of the average loss payment per insured vehicle year for model years 1994-1996. NHTSA has not verified the data in this table.

The table presents vehicles' collision loss experience in relative terms, with 100 representing the average for all passenger vehicles. Thus, a rating of 122 reflects a collision loss experience that is 22 percent higher (worse) than average while a rating of 96 reflects a collision loss experience that is 4 percent lower (better) than average. The table is not relevant for models that have been substantially redesigned for 1997, and it does not include information about models without enough insurance claims experience.

Although many insurance companies use the HLDI information to adjust the "base rate" for the *collision portion* of their auto insurance premiums, the amount of any such adjustment is usually small. It is unlikely that your total premium will vary more than ten per cent depending upon the collision loss experience of a particular vehicle. If you do not purchase collision coverage or your insurance company does not use the HLDI information, your premium will not vary at all in relation to these rankings.

In addition, different insurance companies often charge different premiums for the same driver and vehicle. Therefore, you should contact insurance companies or their agents directly to determine the actual

premium that you will be charged for insuring a particular vehicle.

Please Note: In setting auto insurance premiums, insurance companies mainly rely on factors that are not directly related to the vehicle itself (except for its value). Rather, they mainly consider driver characteristics (such as age, gender, marital status, and driving record), the geographic area in which the vehicle is driven, how many miles are traveled, and how the vehicle is used. Therefore, to obtain complete information about insurance premiums, you should

contact insurance companies or their agents directly.

Insurance companies do not generally adjust their premiums on the basis of data reflecting the crashworthiness of different vehicles. However, some companies adjust their premiums for personal injury protection and medical payments coverage if the insured vehicle has features that are likely to improve its crashworthiness, such as air bags and automatic seat belts.

Test data relating to vehicle crashworthiness are available from NHTSA's New Car Assessment Program (NCAP). NCAP test results demonstrate relative frontal crash protection in new vehicles. Information on vehicles that NHTSA has tested in the NCAP program can be obtained by calling the agency's toll-free Auto Safety Hotline at (800) 424-9393. This information also is available on NHTSA's Web site on the internet (<http://www.nhtsa.dot.gov>).

National Highway Traffic Safety Administration

Research and Development Programs Meeting Agenda

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice.

SUMMARY: This notice provides the agenda for a public meeting at which the National Highway Traffic Safety Administration (NHTSA) will describe and discuss specific research and development projects.

DATES AND TIMES: As previously announced, NHTSA will hold a public meeting devoted primarily to presentations of specific research and development projects on March 11, 1997, beginning at 1:30 p.m. and ending at approximately 5:00 p.m.

ADDRESSES: The meeting will be held at the Hilton Suites, Detroit Metro Airport, 8600 Wickham Road, Romulus, Michigan 48174.

SUPPLEMENTARY INFORMATION: This notice provides the agenda for the sixteenth in a series of public meetings to provide detailed information about NHTSA's research and development programs. This meeting will be held on March 11, 1997. The meeting was announced on February 18, 1997 (62 FR 7293). For additional information about the meeting consult that announcement.

Starting at 1:30 p.m. and concluding by 5:00 p.m., NHTSA's Office of Research and Development will discuss the following topics:

- Status of air bag aggressiveness and advanced air bag research, including child restraint/air bag interaction (CRABI) dummy testing,
- Demonstration of CD ROM for child restraint/vehicle compatibility,
- Status and plans for the 1997 calendar year for the National Automotive Sampling System Crashworthiness Data Base (NASS CDS),

Special crash investigation studies of air bag cases, Status and plans for anti-lock brake systems research, and Status of research on restraint systems for rollover protection.

NHTSA has based its decisions about the agenda, in part, on the suggestions it received by February 21, 1997, in response to the announcement published February 18, 1997.

As announced on February 18, 1997, in the time remaining at the conclusion of the presentations, NHTSA will provide answers to questions on its research and development programs, where those questions have been submitted in writing by February 27, 1997, to Ralph J. Hitchcock, Acting Associate Administrator for Research and Development, NRD-01, National Highway Traffic Safety Administration, Washington, DC 20590. Fax number: 202-366-5930.

FOR FURTHER INFORMATION CONTACT: Rita I. Gibbons, Staff Assistant, Office of Research and Development, 400 Seventh Street, SW, Washington, DC 20590. Telephone: 202-366-4862. Fax number: 202-366-5930.

Issued: March 3, 1997.

Ralph J. Hitchcock,

Acting Associate Administrator for Research and Development.

National Highway Traffic Safety Administration

Docket No. 96-114; Notice 1

Notice of Tentative Decision That Certain Noncomplying Vehicles Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Request for comments on tentative decision that certain noncomplying vehicles are eligible for importation into the United States.

SUMMARY: This notice requests comments on a tentative decision by the National Highway Traffic Safety Administration (NHTSA) that certain vehicles that do not comply with all applicable Federal motor vehicle safety standards, but that are certified by their original manufacturer as complying with all applicable Canadian motor vehicle safety standards, are eligible for importation into the United States. The vehicles in question either (1) are substantially similar to vehicles that were certified by their manufacturers as complying with the U.S. safety standards and are capable of being

readily altered to conform to those standards, or (2) have safety features that comply with, or are capable of being altered to comply with all U.S. safety standards. This notice also requests comments on a proposal to rescind the existing vehicle eligibility number applicable to all vehicles certified by their original manufacturer as complying with Canadian safety standards (eligibility number VSA-1), and to assign four separate eligibility numbers, based on vehicle classification and weight.

DATE: The closing date for comments on this tentative decision is April 7, 1997.

ADDRESS: Comments should refer to the docket number and notice number and be submitted to: Docket Section, Room 5109, National Highway Traffic Safety Administration, 400 Seventh Street, SW, Washington, DC 20590. (Docket hours are from 9:30 am to 4 pm.)

FOR FURTHER INFORMATION CONTACT: George Entwistle, Office of Vehicle Safety Compliance, NHTSA (202-366-5306).

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards (FMVSS) shall be refused admission into the United States unless NHTSA has decided, that the vehicle is substantially similar to a motor vehicle of the same model year that was originally manufactured for importation into and sale in the United States and was certified as complying with all applicable FMVSS, and also finds that the noncompliant vehicle is capable of being readily altered to conform to all applicable FMVSS. Where there is no substantially similar U.S.-certified motor vehicle, 49 U.S.C. 30141(a)(1)(B) permits a nonconforming motor vehicle to be admitted into the United States if NHTSA decides that its safety features comply with, or are capable of being altered to comply with, all applicable FMVSS.

A. First Decision on Canadian Vehicles

On August 13, 1990, NHTSA published a Federal Register notice at 55 FR 32988 announcing that it had made a final determination on its own initiative that certain motor vehicles that are certified by their original manufacturer as complying with all applicable Canadian motor vehicle safety standards (CMVSS) are eligible for importation into the United States. The agency made this determination under the precursor to 49 U.S.C.
