

entities must agree to charge a price that will not exceed the amount determined under a statutory formula. The covered entities—certain PHS grantees, disproportionate share hospitals (DSHs), and other selected entities, total approximately 11,000 sites. Most of these entities serve the economically disadvantaged or medically uninsured. The legislative intent of Section 340B is “to enable * * * certain Federally-funded clinics to obtain lower prices on the drugs that they provide to their patients.”

Because of the significant savings that covered entities can realize if they are able to access Section 602 pricing, it is imperative to know the degree of satisfaction with various aspects of the program service and where improvements can be made; and to identify the barriers to access and what changes can be made to reduce them. The HRSA Office of Drug Pricing Program (ODPP) administers the program and has designed a survey with questions that relate to the two areas that they can modify readily: The

availability of information about the program, and the design of the program. The survey also includes questions on the amount of savings realized by participating entities, how the savings are used, and factors affecting satisfaction with savings. Participating and non-participating entities will be surveyed, and the results will be used to guide program changes that will increase customer satisfaction and ultimately increase program participation.

The estimated burden is as follows:

| Respondents | Number of Respondents | Responses per respondent | Burden per response (hours) | Total burden hours |
|------------------------|-----------------------|--------------------------|-----------------------------|--------------------|
| Covered entities | 1,508 | 1 | .25 | 377 |
