

increases as a result of other factors, including market changes, will not require FPI to initiate the guidelines process. The fact that 25% may "trigger" the guidelines does not necessarily mean the Board of Directors cannot approve an FPI production level resulting in a federal market share above 25%.

The prior three years' data will be used to determine the share of the federal government market, to ensure that annual fluctuations are taken into account and normalized.

FPI may produce at the rate of previously achieved annual sales levels, adjusted for inflation, without initiating the guidelines process.

In cases where FPI sales inadvertently or insubstantially exceed Board authorized levels, FPI will make every effort to adjust its production by a corresponding amount among the following year. If FPI plans call for continued growth, it will invoke the guidelines process without delay and seek Board approval of future production levels. Should the Board decide on a production level lower than that which FPI already achieved, FPI will adjust its future plans and, if necessary scale back, to comply with the Board's decision.

In cases of extreme public exigency, such as national disaster or national defense emergency, such as during Operation Desert Storm, FPI may exceed guidelines thresholds, provided FPI receives specific orders or requests from senior Department of Defense and/or Executive Branch officials. Increased sales resulting from national exigencies will not be considered a violation of guidelines ceilings in the year which they occurred. In such cases, the higher production levels achieved by FPI will be temporary, and will not be used as part of FPI's baseline for future calculations of significant expansion. Such exceptional events will be subject to approval by FPI's Chief Operating Officer, with concurrence of FPI's Board of Directors.

Subject to other provisions noted in this procedure, FPI's sales for the current fiscal year will be utilized as the based year for future application.

Prior decisions of FPI's Board of Directors will remain unaffected by these changes to the definitions.

These proposed rules have been reviewed by FPI's Growth Strategies Implementation Committee. The following officials are represented on the Committee:

Executive Vice President, Envelope Manufacturers Association of America

Vice President—Government Affairs, Screen Printing and Graphic Imaging Association International Manager, Break-Out Procurement Center Representative Program, Small Business Administration
Former Senior Staff Member, Brookings Institution
Head of Office of Wages and Industrial Relations, AFL-CIO
President, State/Federal Correctional Vendors Association

Their comments and suggestions have been incorporated into this proposed procedure.¹

All comments received in response to this proposed procedure have been provided to the FPI Board of Directors, which has approved these procedures for publication and implementation on an interim basis.

Robert Grieser,

Manager, Planning, Research and Activation Branch.
