

SUPPLEMENTARY INFORMATION:

Electronic Availability: Electronic copies of this document and the Implementation Plan are available from the EPA home page at the Environmental Sub-Set entry for this document under "Regulations" (<http://www.epa.gov/fedrgrstr/>). The Implementation Plan is also posted at the FQPA section of EPA's Website: <http://www.epa.gov/oppptsps1/FQPA>.

FQPA represents the most significant piece of pesticide and food safety legislation enacted in 30 years. It provides unprecedented opportunities to safeguard the health of all Americans, particularly infants and children, from risks posed by pesticides. The President called it "the peace of mind act" because it will "give parents the peace of mind that comes from knowing that the fruits, vegetables, and grains that they set down in front of their children are safe." FQPA signals a new era in food safety regulation in the United States. Major provisions, once fully implemented, will strengthen health and environmental protection in a number of ways. FQPA will:

- Establish a single, health-based standard for all pesticide residues in food, eliminating past inconsistencies in the law which treated residues in some processed foods differently from other raw and processed foods.
 - Provide for a more complete assessment of potential risks, with special protections for potentially sensitive groups, such as infants and children.
 - Require a reassessment of all existing residue limits in accordance with the new standard.
 - Expand consumers' "right to know" about pesticide risks and benefits by requiring a new brochure for display in supermarkets and grocery stores.
 - Ensure that all pesticides are periodically re-evaluated for adherence to current safety standards and are supported by up-to-date scientific data.
 - Expedite the approval of safer, reduced risk pesticides.
 - Encourage the development of safer, effective crop protection tools for American farmers.
 - Promote national uniformity in pesticide residue limits, while respecting states' rights to require labeling or other warnings.
 - Establish a more consistent, protective regulatory process, grounded in sound science and adaptable to future advances in scientific understanding.
- No specific transition period is provided by the new FQPA, but the law contains sufficient flexibility to allow for a phase-in period as EPA deals with the complexities of the new provisions.

An important element of EPA's plan for implementation is the development of interim strategies to allow EPA to make timely decisions which are protective and economical but which can be revisited as implementation progresses. EPA intends to continually review all activities undertaken to implement the FQPA amendments, to assess their effectiveness and to make modifications as necessary. EPA will update implementation communication materials on a regular basis.

List of Subjects

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides, and pests.

Dated: March 12, 1997.

Lynn R. Goldman,

Assistant Administrator for Prevention, Pesticides and Toxic Substances.
