

Assuming a discard rate of 14.7 percent, the estimate of dead discards should be revised from 195.2 mt to 341.6 mt, or an increase of 146.4 mt.

The total reduction in the 1996 fishing year landings quota for the longline fishery is 168.3 mt plus 146.4 mt, or 314.7 mt. This leaves a total directed landing quota of 749.7 mt for the Atlantic swordfish fishery.

Closure of the Fishery

The landings of swordfish in the longline fishery in the second semiannual season reached 610 mt by March 1, 1997, leaving 139.7 mt in the landings quota. Additional quota remaining for the second half includes 90 mt from the bridge period quota (January 1–May 31, 1996) and 96 mt from the bycatch quota for 1996. Thus, the total quota remaining as of March 1, 1997, is 325.7 mt (139.7 + 90 + 96 mt). In 1996, landings of swordfish by longliners reached 213 mt in March. If the same rate occurs in March of 1997, this would leave 113 mt for both April and May.

During a two month closure of the directed fishery in 1995, with a bycatch limit of 15 fish per trip for November and 6 fish per trip in December, the bycatch of swordfish was estimated to be 64 mt. Under a bycatch limit of 5 fish per trip during the proposed closure, NMFS estimates that 50 mt could be landed during the two month closure, leaving 63 mt available for the directed fishery during April. At the rate of landings which occurred during April 1996 (43 mt per week), 63 mt would allow 11 days of directed fishing prior to the closure. Thus, NMFS estimates that the directed quota for swordfish will be taken on or before April 12, 1997.

Therefore, NMFS announces that the directed fishery for swordfish is closed at 12 noon on April 12, 1997. All vessels must be in port with their swordfish offloaded on or before this closing date. This notice provides more than a four week period during which swordfish vessel owners can plan their fishing and sale of landings prior to the closure deadline. During the closure of the directed fishery, a person may not fish for swordfish from the North Atlantic stock, and no more than 5 swordfish per vessel per trip may be possessed or landed incidental to longline fishing for other species. As previously stated, no harpoon fishery set-aside has been established for this semi-annual period. Therefore, a person fishing aboard a vessel using or having aboard harpoon gear may not fish for swordfish from the North Atlantic swordfish stock, and no swordfish may be possessed in the

North Atlantic Ocean, including the Gulf of Mexico and Caribbean Sea, north of 5° N. latitude, or landed in an Atlantic, Gulf of Mexico, or Caribbean state.

Classification

This action is required by 50 CFR 630.24(d) and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 971 *et seq.*

Dated: March 14, 1997.

Gary C. Matlock,

Director, Office of Sustainable Fisheries,
National Marine Fisheries Service.

[I.D. 031497A]

Fisheries of the Exclusive Economic Zone Off Alaska; Season Opening

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of fishing season dates.

SUMMARY: NMFS is opening the directed fishery for sablefish with fixed gear managed under the Individual Fishing Quota (IFQ) program. The season will open on 12:00 noon, Alaska local time (A.l.t.), March 15, 1997, and will close 12:00 noon, A.l.t., November 15, 1997. This period runs concurrently with the IFQ season for Pacific halibut announced by the International Pacific Halibut Commission (IPHC).

EFFECTIVE DATE: March 15, 1997, 12:00 noon, A.l.t., through November 15, 1997, 12:00 noon, A.l.t.

FOR FURTHER INFORMATION CONTACT: John Lepore, 907-586-7228.

SUPPLEMENTARY INFORMATION: Beginning in 1995, fishing for Pacific halibut (*Hippoglossus stenolepis*) and sablefish (*Anoplopoma fimbria*) with fixed gear in the IFQ regulatory areas defined in 50 CFR 679.2 has been managed under the IFQ Program. The IFQ Program is a regulatory regime designed to promote the conservation and management of these fisheries and to further the objectives of the Magnuson-Stevens Fishery Conservation and Management Act and the Northern Pacific Halibut Act. Persons holding quota share receive an annual allocation of IFQ. Persons receiving an annual allocation of IFQ are authorized to harvest IFQ species within specified limitations. Further information on the implementation of the IFQ Program, and the rationale supporting it, is contained in the

preamble to the final rule implementing the IFQ Program published in the Federal Register, November 9, 1993 (58 FR 59375) and subsequent amendments.

This announcement is consistent with 50 CFR 679.23(g)(1), which requires that directed fishing for sablefish managed under the IFQ program be specified by the Administrator, Alaska Region, NMFS (Regional Administrator), and announced by publication in the Federal Register. This method of season announcement was selected to facilitate coordination between the sablefish season, chosen by the Regional Administrator, and the halibut season, chosen by the IPHC. The directed fishing season for sablefish with fixed gear managed under the IFQ program will open on 12:00 noon, A.l.t., March 15, 1997, and will close 12:00 noon, A.l.t., November 15, 1997. This period runs concurrently with the IFQ season for Pacific halibut announced by the IPHC. The IFQ halibut season was announced by publication in the Federal Register, March 18, 1997.

Classification

Fisheries of the Exclusive Economic Zone Off Alaska; Offshore Component Pollock in the Aleutian Islands Subarea

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Modification of a closure.

SUMMARY: NMFS is opening directed fishing for pollock by vessels catching pollock for processing by the offshore component in the Aleutian Islands subarea (AI) of the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to fully utilize the total allowable catch (TAC) of pollock in that area.
