Title: School Nutrition Study.

OMB Control Number: 0584–New.

Summary: This proposed study is designed to examine meals offered by and characteristics of school nutrition programs. Data will be collected from a nationally representative sample of public elementary, middle and high schools during the fall of the 1997–98 school year.

Need and Use of the Information: The data collection and analysis will provide USDA with an up-to-date assessment of the progress of the nation's schools implementing the *Dietary Guidelines and Recommended Daily Allowances* in school meats.

Description of Respondents: State, Local, or Tribal Government.

Number of Respondents: 1,581.

Frequency of Responses: Reporting: One-time only.

Total Burden Hours: 9,482.

Donald Hulcher,

Deputy Departmental Clearance Officer.

BILLING CODE 3410–01–M

Animal and Plant Health Inspection Service

[Docket No. 97–022–1]

Intent to Issue Veterinary Biological Product Licenses

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service intends to issue veterinary biological product licenses to Rhone Merieux, Inc., for four veterinary vaccines intended for use in dogs. This proposed action is consistent with the conclusions of a risk analysis that formed the basis of an environmental assessment and finding of no significant impact prepared prior to the authorization of field trials for those

vaccines. With this notice, we are stating our intention to issue veterinary biological product licenses for those vaccines after 14 days from the date of this notice unless new substantial issues bearing on the effects of the action contemplated here are brought to our attention.

ADDRESSES: Copies of the environmental assessment and finding of no significant impact prepared for the field testing of the products may be obtained by writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. Please refer to the docket number of this notice when requesting copies. Copies of the environmental assessment and finding of no significant impact (as well as the risk analysis with confidential business information removed) are also available for public inspection at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect those documents are requested to call ahead on (202) 690–2817 to facilitate entry into the reading room.

FOR FURTHER INFORMATION CONTACT: Dr. Jeanette Greenberg, Technical Writer-Editor, Center for Veterinary Biologics-Licensing and Policy Development, VS, APHIS, USDA, 4700 River Road Unit 148, Riverdale, MD 20737–1231; telephone (301) 734–5338; fax (301) 734–8910.

SUPPLEMENTARY INFORMATION: We are advising the public that the Animal and Plant Health Inspection Service (APHIS) intends to issue veterinary biological product licenses to Rhone Merieux, Inc., Establishment License No. 298, for four veterinary vaccines intended for use in dogs. These vaccines each contain a canarypox-vectored canine distemper fraction. The true names and product codes of the four vaccines are as follows:

(1) Canine Distemper-Adenovirus Type 2-Coronavirus-Parainfluenza-Parvovirus Vaccine, Modified Live Virus, Canarypox Vector, Leptospira Bacterin (Code 46J9.R1);

(2) Canine Distemper-Adenovirus Type 2-Parainfluenza-Parvovirus Vaccine, Modified Live Virus, Canarypox Vector, Leptospira Bacterin (Code 4639.R1);

(3) Canine Distemper-Adenovirus Type 2-Coronavirus-Parainfluenza-Parvovirus Vaccine, Modified Live Virus, Canarypox Vector (Code 1591.R1); and

(4) Canine Distemper-Adenovirus Type 2-Parainfluenza-Parvovirus Vaccine, Modified Live Virus, Canarypox Vector (Code 13D1.R1).

The products numbered (1) and (3) above were field tested directly. The products numbered (2) and (4) above contain the same components as (1) and (3), respectively, except that they lack the Canine Coronavirus fraction; therefore, they are being licensed based on data generated for the products numbered (1) and (3).

With this notice, APHIS states its intention to issue veterinary biological product licenses for these products after 14 days from the date of this notice unless new substantial issues, bearing on the effects of the action contemplated here, are brought to APHIS' attention.

This proposed action is consistent with the conclusions of a risk analysis, which formed the basis for the environmental assessment (EA) supporting authorization of a field trial using these vaccines. Since the issues raised by authorization of a field trial and by issuance of a product license are identical, and since the field trial data have supported the conclusions of the original EA and finding of no significant impact (FONSI), APHIS has concluded that the EA and FONSI generated for the field trial are also applicable to the proposed licensing actions. Therefore, APHIS does not intend to issue a separate EA to support issuance of product licenses. Based on our original FONSI, reconfirmed here, we have determined that an environmental impact statement need not be prepared.

Authority: 21 U.S.C. 151–159.

Done in Washington, DC, this 21st day of March 1997.

Donald W. Luchsinger,

Acting Administrator, Animal and Plant Health Inspection Service.

Forest Service

Changes in Mammoth Creek Minimum Streamflow Requirements and Point of Measurement, and Changes in Place of Use

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service, Department of Agriculture, will prepare an environmental impact statement (EIS) for the proposed amendment to the existing Master Operating Agreement establishing minimum streamflow requirements for Mammoth Creek, and Point of Measurement. The Forest Service, Inyo National Forest, Mono County, California, is acting as joint lead agency on the project, together with the
