Liberty Forest Health Improvement Project, Tahoe National Forest, Sierra County, CA

AGENCY: Forest Service, USDA.

ACTION: Notice; intent to prepare an environmental impact statement.

SUMMARY: The U.S. Department of Agriculture, Forest Service, Tahoe National Forest will prepare an environmental impact statement (EIS) for a proposed forest health improvement project within the boundaries of the Liberty Analysis Area. This area is identified by watershed boundaries that encompass about 12,769 total acres. The analysis area is located on the Sierraville Ranger District and is about eight miles south and east of Sierraville, California. It is located within all or portions of T18N and T19N, R14E and R15E, MDB&M.

The primary objectives of the project are to improve the forest health and to reduce the risk of stand-destroying fires by treating about 3,100 acres within the analysis area. The project proposal focuses on reducing stocking levels of existing weakened and overcrowded stands that are mixed with dead and dying trees. The trees to be removed are relatively small second-growth, evenaged timber, averaging 10 inches to 18 inches in diameter, 50 to 90 feet tall, and 80 to 110 years old.

The agency invites comments and suggestions on the scope of the analysis. In addition, the agency gives notice of the full environmental analysis and decision-making process that will occur on the proposal so that interested and affected people are aware of how they may participate and contribute to the final decision.

DATES: Comments should be made in writing and received by April 23, 1997.

ADDRESSES: Written comments concerning the project should be directed to Sam Wilbanks, District Ranger, Sierraville Ranger District, P.O. Box 95, Sierraville, CA 96126.
