Department of the Army

Draft Environmental Impact Statement (DEIS) for the Proposed Upgrade of Training Areas and Facilities, Camp Atterbury, Indiana by the Indiana Army National Guard (INARNG)

AGENCY: Department of the Army, National Guard Bureau.

ACTION: Notice of availability.

SUMMARY: The purpose of this project is to maximize training opportunities for military units that use Camp Atterbury. Military units need to be able to maintain a high level of training and state of readiness to support national defense and state missions in times of natural disaster, civil unrest, and other emergencies. Adequate training opportunities, with up-to-date equipment, must be available to allow

them to train for their assigned missions.

The INARNG proposes to upgrade training areas and facilities at Camp Atterbury, Indiana. The proposed action includes the construction of a Multi-Purpose Training Range (MPTR) and two maneuver corridors. The MPTR will be located in the southwest sector of the installation and will be used for training by armor, attack helicopters, Infantry Fighting Vehicles, and dismounted infantry units. The MPTR would include a support area, firing area and a target area. The firing area would include stationary, moving and defilade firing positions. The target area would contain stationary and moving targets. Firing points would be oriented to provide northeasterly trajectories into the existing impact area. The MPTR itself would occupy approximately 80 hectares (200 acres) and, including the safety fan, the area involved would total about 4550 hectares (11,250 acres). This action also proposes the development of two maneuver corridors for use by tracked vehicles. These corridors would be in a north-south orientation along the east and west borders of Camp Atterbury, and would include approximately 975 hectares (2400 acres).

Two alternatives in addition to the proposed action were considered, an alternative with less development (Alternative 2B), and the no action alternative. Alternative 2B involves the MPTR being located in the northwest sector of Atterbury, with firing points oriented to provide southeasterly trajectories into the impact area and would involve the development of only the eastern maneuver corridor. The no action alternative considers the continued use of Camp Atterbury without the proposed upgrade.

COMMENTS: The DEIS will be available for public review for 45 days from the date the Notice of Availability is published in the **Federal Register** by the Environmental Protection Agency.

PUBLIC MEETING: The Indiana Army National Guard will conduct a formal public meeting to discuss concerns and receive comments on the DEIS. The specific location, date and time will be announced through area newspapers. Comments received at the public meeting and by mail will be compiled and reviewed. Responses to all relevant environmental comments will be prepared. Responses to comments and/or any new pertinent information will be incorporated into the Final EIS.

ADDRESSES: Copies of the DEIS will be made available to the general public through advertisements and Legal
