Atwater, CA**

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes a Class E airspace area at Atwater, CA. The development of a VHF Ominidirectional Range (VOR) Standard Instrument Approach Procedure (SIAP) to Runway (RWY) 13 at Castle Airport has made this action necessary. The intended effect of this action is to provide adequate controlled airspace to accommodate for the VOR SIAP to RWY 13 and other Instrument Flights Rules (IFR) operations at Castle Airport, Atwater, CA.

EFFECTIVE DATE: 0901 UTC May 22, 1997.

SUPPLEMENTARY INFORMATION:

History

On January 31, 1997, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) by establishing a Class E airspace area at Atwater, CA (62 FR 4668). This action will provide adequate controlled airspace to accommodate a VOR SIAP to RWY 13 and other IFR operations to Castle Airport, Atwater, CA.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9D dated September 4, 1996, and effective September 16, 1996, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in this Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) establishes a Class E airspace area at Atwater, CA. The development of a GPS SIAP to RWY 13 has made this action necessary. The effect of this action will provide adequate airspace for aircraft executing the VOR RWY 13 SIAP and other IFR operations at Castle Airport, Atwater, CA.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 10034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
