Background on the Integrated Risk Project (IRP)

In a letter dated October 25, 1995, to Dr. Matanoski, Chair of the SAB Executive Committee, Deputy Administrator Fred Hansen charged the SAB to: (a) Develop an updated ranking of the relative risk of different environmental problems based upon explicit scientific criteria; (b) provide an assessment of techniques and criteria that could be used to discriminate among emerging environmental risks and identify those that merit serious, near-term Agency attention; (c) assess the potential for risk reduction and propose alternative technical risk reduction strategies for the environmental problems identified; and (d) identify the uncertainties and data quality issues associated with the relative rankings. The project will be conducted by several SAB panels, working at the direction of an *ad hoc* Steering Committee established by the Executive Committee.

Single copies of Reducing Risk, the report of the previous relative risk ranking effort of the SAB, can be obtained by contacting the SAB's Committee Evaluation and Support Staff (1400), 401 M Street, SW, Washington, DC 20460, telephone (202) 260-8414, or fax (202) 260-1889. 4. Environmental Engineering Committee (EEC) Subcommittees

Two Subcommittees of the Science Advisory Board's (SAB's) Environmental Engineering Committee (EEC) will each conduct a public meeting. On Tuesday, April 29, 1997, the EEC's Special Topics Subcommittee will meet from 8:30 am to 6 pm in the Science Advisory Board Conference Room, Room 2103, U.S. Environmental Protection Agency Headquarters Building, 401 M Street SW, Washington, DC 20460. On Wednesday and Thursday, April 30–May 1, 1997, the EEC's Surface Impoundments Study Subcommittee will meet from 8:30 am to no later than 5 pm each day in Conference Room C on the second floor of EPA's Crystal Station Building, 2805 Crystal Drive in the Crystal City section of Arlington, Virginia.

Purpose of the Meetings

(a) *Special Topics Subcommittee:* On April 29, 1997, the Special Topics Subcommittee with review proposed national guidance on field filtration of ground water samples taken for metals analysis from monitoring wells for Superfund site assessment. Copies of this seven-page review document can be obtained from Mr. Daniel Thornton of the EPA's Office of Emergency and Remedial Response, phone (703) 603-8811. The current charge for this review is to, "provide a technical review of the proposed guidance, evaluate consistency with other Agency programs, and provide guidance on the appropriateness and potential impacts of the document. Specific issues include: (a) Technical considerations, such as colloidal mobility and transport mechanisms; phase-changes; and fate and transport of inorganic contaminants; and (b) policy issues, including guidance from other Federal programs, and potential adverse impact on other guidance or work in progress."

The Special Topics Subcommittee will also review documents relating to the use of toxicity weighting in the Office of Enforcement and Compliance Analysis Sector Facility Indexing Project (SFIP). Copies of these review documents can be obtained from Ms. Maria Eiseman in the Manufacturing, Energy, and Transportation Division of OECA, phone (202) 564-7016; please note that some documents may be available before others. The Agency asked that the SAB address the following questions: (1) The SFIP uses

chronic human health toxicity weights adopted from the TRI Relative Risk Environmental Indicators. Does the modified Hazard Ranking System scoring methodology used by the Indicators reflect accepted scientific procedures and evidence regarding the relative ranking of chemical toxicity?; and (2) EPA currently uses unweighted TRI pounds to evaluate pollutant releases from individual facilities. As a first step towards incorporating relative risk in this evaluation, is it acceptable to use toxicity weights to provide additional contextual information regarding the human health hazards associated with pollutant releases?

(b) *Surface Impoundments Study Subcommittee:* On April 30–May 1, 1997, the Surface Impoundments Study Subcommittee will review the Office of Solid Waste's proposed plan for a Congressionally required study of surface impoundments. Copies of the review documents can be obtained from Ms. Becky Cuthbertson in the Economics, Methods, and Risk Analysis Division, phone (703) 308-8447; please note that some documents may be ready before others. In summary, the tentative charge for this review is to comment on the technical merits of the overall study structure; to comment on the technical merits of the proposed risk assessment; and to comment upon appropriate points in the study design and implementation for involvement of outside technical experts.

The full Environmental Engineering Committee anticipates being briefed on the reports of these Subcommittee reviews at a meeting to be held in Cincinnati June 30–July 3, 1997. A future **Federal Register** Notice will announce this meeting.

For Further Information: After April 4, 1997, agendas and rosters for both Subcommittees can be obtained from the Subcommittee Secretary, Mrs. Dorothy Clark, tel. (202) 260-8414, fax (202) 260-7118, or by Email: clark.dorothy@epamail.epa.gov. Members of the public desiring additional information about the meeting should contact Mrs. Kathleen Conway, Designated Federal Official, Environmental Engineering Committee, Science Advisory Board (1400), U.S. EPA, 401 M Street, SW, Washington, DC 20460; telephone/voice mail at (202) 260-2558; fax at (202) 260-7118; or via Email at: conway.kathleen@epamail.epa.gov.

Members of the public who wish to make a brief oral presentation to either Subcommittee must contact Mrs. Conway in writing (by letter or by fax—see previously stated information) no later than 12 noon Eastern Time,

Wednesday, April 23, 1997, in order to be included on the Agenda. Public comments will be limited to five minutes per speaker or organization. The request should identify the name of the individual who will make the presentation, the organization (if any) they will represent, any requirements for audio visual equipment (e.g., overhead projector, 35mm projector, chalkboard, etc), and at least 35 copies of an outline of the issues to be addressed or the presentation itself.

Providing Oral or Written Comments at SAB Meetings

The Science Advisory Board expects that public statements presented at its meetings will not be repetitive of previously submitted oral or written statements. In general, each individual or group making an oral presentation will be limited to a total time of ten minutes. For conference call meetings, opportunities for oral comment will be limited to no more than five minutes per speaker and no more than fifteen minutes total. Written comments (at least 35 copies) received in the SAB Staff Office sufficiently prior to a meeting date, may be mailed to the relevant SAB committee or subcommittee prior to its meeting; comments received too close to the meeting date will normally be provided to the committee at its meeting. Written comments may be provided to the relevant committee or subcommittee up until the time of the meeting.

Information concerning the Science Advisory Board, its structure, function, and composition, may be found in The FY1996 Annual Report of the Staff Director which is available from the SAB Committee Evaluation and Support Staff (CESS) by contacting US EPA, Science Advisory Board (1400), Attention: CESS, 401 M Street, SW, Washington, DC 20460 or via fax (202) 260-1889.
