Background and Purpose

On February 18, 1997, the Coast Guard published a notice of initiation of the Additional Hazards Study and request for comments in the Federal Register (62 FR 7292). This notice extends the comment period. The Additional Hazards Study will use information gathered at two public workshops held in Seattle, Washington on March 6, 1997, and collected from other sources which includes the public comments to the docket. During the course of the public workshops, several requests were made to extend the open period of the public docket to allow workshop participants to submit relevant material to the docket. The information developed during the workshops, along the information submitted to the docket and derived from other sources, will be used by an expert panel. The panel will use the information to identify and rank, by level of risk, the hazards related to a major spill of cargo or fuel oil by commercial vessels transiting the study area. The expert panel will also identify potential measures to decrease the risks.

A brief summary of the March 6, 1997 workshops, which includes potential hazards, potential additional measures, and attendees, is available by contacting the person listed above in **FOR FURTHER INFORMATION CONTACT**.

Dated: March 27, 1997.

ACTION: Notice of intent.

FOR FURTHER INFORMATION CONTACT:

The project length is approximately 10.3 km. The proposed project is necessary to provide additional capacity to mitigate congestion for north-south traffic on the east side of Savannah.

A draft EIS for this project was approved on February 20, 1997; however, due to a recent discovery of an active bald eagle's nest near the applicant's preferred alternate, a supplemental draft EIS will be prepared. Letters describing this action and soliciting comments will be sent to the appropriate Federal, State, and local agencies. A public hearing will be held and a public notice will be given of the time and place of the hearing. Comments or questions concerning the supplemental draft EIS should be directed to the FHWA at the address provided above.
