Draft Environmental Impact Statement/ Environmental Impact Report (DEIS/ EIR) for the Seven Oaks Dam Water Conservation Feasibility Study, San Bernardino County, California

AGENCY: Army Corps of Engineers, Los Angeles District, DoD.

ACTION: Notice of Availability.

SUMMARY: The Los Angeles District Corps of Engineers and San Bernardino

County Flood Control District propose establishing a seasonal water conservation and supply pool at Seven Oaks Dam. The study was developed in response to local concerns regarding future water supply sources, given continued regional population growth, dwindling imported water supplies, and continued increases in the cost of water. As proposed the project would retain water behind Seven Oaks Dam beginning in March through May until the target conservation pool elevation is reached, with releases to the downstream spreading grounds from June through September. Releases would be made to ensure the conservation pool is drained each year by September 30, prior to the winter flood control season.
