For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

De Havilland, Inc.: Docket 97-NM-36-AD.

Applicability: All Model DHC-7 series airplanes, certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent loss of airplane controllability, or engine overspeed and consequent loss of engine power caused by the power levers being positioned below the flight idle stop while the airplane is in flight, accomplish the following:

(a) Within 30 days after the effective date of this AD, revise the Limitations Section of the FAA-approved Airplane Flight Manual (AFM) to include the following statements. This action may be accomplished by inserting a copy of this AD into the AFM.

"Positioning of power levers below the flight idle stop while the airplane is in flight is prohibited. Such positioning may lead to loss of airplane control or may result in an overspeed condition and consequent loss of engine power."

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, New York Aircraft Certification Office (ACO), FAA, Engine and Propeller Directorate. Operators shall submit their requests through an appropriate FAA Maintenance Operations Inspector, who may add comments and then send it to the Manager, New York ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the New York ACO.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on April 8, 1997.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Corps of Engineers

36 CFR Part 327

Shoreline Use Permits, Flotation

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Corps proposes to amend its regulation which contains guidelines for granting shoreline use permits and conditions under which shoreline use permits can be used. We are proposing this to accommodate special needs of the public, and to incorporate changes deemed necessary to make new technologies available to the public when meeting certain conditions of their shoreline use permits.

DATES: Comments must be submitted on or before May 30, 1997.

ADDRESSES: HQUSACE, CECW-ON, Washington, D.C. 20314-1000.

FOR FURTHER INFORMATION CONTACT: Mr. Darrell E. Lewis, (202) 761-0247, HQUSACE, CECW-ON, Washington, D.C. 20314-1000.

SUPPLEMENTARY INFORMATION: Pursuant to its authorities in 16 U.S.C. 460d, the Corps promulgated a regulation which was published in the **Federal Register** as a final rule on July 27, 1990. Since that time a specific instance has led to this amendment to Paragraph 9 of Appendix A, Section 327.30 which gives operational project managers flexibility to take special circumstances of the applicant into consideration when issuing a permit. This language reflects the Corps desire to accommodate basic access for those individuals who have requested waivers due to either obvious limiting health conditions or those documented by a doctor's certification.

Since the development and subsequent publishing of flotation material requirements for all docks and boat mooring buoys required under the shoreline management program in the **Federal Register** on July 27, 1990, new technologies and methods have resulted in product changes and influenced flotation material specifications acceptable to the Corps. Paragraph 14, Appendix C, of Section 327.30 in this proposed rulemaking reflects the Corps amended flotation requirements on all new docks and boat mooring facilities.
