(vi) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Annex attached.

(vii) *Date Report Delivered to Congress:* April 8, 1997.

Policy Justification

Israel—UH-60L BLACKHAWK Helicopters

The Government of Israel has requested the purchase of 15 UH-60L BLACKHAWK helicopters, 30 GE turbine engines, four spare GE turbine engines with containers, external rescue hoist provisions, rotor brake system, spare and repair parts, tools and support equipment, publications and technical data, personnel training and training equipment, U.S. Government Quality Assurance Team (QAT), contractor engineering and technical support services and other related elements of logistics support. The estimated cost is \$200 million.

This sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country which has been and continues to be an important force for political stability and economic progress in the Middle East.

Israel, which already has Blackhawk helicopters in its inventory, will have no difficulty absorbing the additional helicopters.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractors participating in the program will be United Technologies, Sikorsky Aircraft, Stratford, Connecticut and General Electric, Lynn, Massachusetts. There are no offset agreements proposed to be entered into in connection with this potential sale.

A United States Government Quality Assurance Team will be required in-country for a minimum of one week during the delivery and initial operation of the helicopters. A U.S. contractor field service representative will also be required in-country for approximately six months to support the new helicopters.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

Annex Item No. vi

(vi) *Sensitivity of Technology:*

1. The UH-60L BLACKHAWK helicopter is Unclassified. The highest level of classified information required to be released for training, operation and maintenance of the BLACKHAWK is Confidential. The highest level which could be revealed through reverse engineering or testing of the end item is Confidential. This information includes Confidential reports and test data, as well as performance and capability data, classified Confidential/Secret.

2. If a technologically advanced adversary were to obtain knowledge of the specific hardware in this sale, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

3. A determination has been made that the recipient country can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

Defense Science Board Task Force on Innovative Support Structure, Phase II

ACTION: Notice of advisory committee meetings.

SUMMARY: The Defense Science Board Task Force on Innovative Support Structure, Phase II will meet in closed session on May 13, 1997 at Strategic Analysis, Inc., Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition and Technology on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will participate in an advisory capacity to the Infrastructure Panel Chairman, Quadrennial Defense Review, and provide appropriate analysis and inputs to the Infrastructure Panel deliberations.

In accordance with Section 10(d) of the Federal Advisory Committee Act, P.L. No. 92-463, as amended (5 U.S.C. App. II, (1994)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. § 552b(c)(1) (1994), and that accordingly this meeting will be closed to the public.

Dated: April 10, 1997.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.
