DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 040997C]

Endangered Species; Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Receipt of applications for modification 6 to research/enhancement permit 848 (P507D) and modification 1 to research/enhancement permit 1011 (P211J).

SUMMARY: Notice is hereby given that the Washington Department of Fish and Wildlife in Olympia, WA (WDFW) and the Oregon Department of Fish and Wildlife in La Grande, OR (ODFW) have applied in due form for modifications to permits authorizing takes of threatened species for research/enhancement purposes.

DATES: Written comments or requests for a public hearing on either of these modification applications must be received on or before May 16, 1997.

ADDRESSES: The applications and related documents are available for review in the following offices, by appointment:

Office of Protected Resources, F/PR3, NMFS, 1315 East-West Highway, Silver Spring, MD 20910-3226 (301-713-1401); and

Environmental and Technical Services Division, 525 NE Oregon Street, Suite 500, Portland, OR 97232-4169 (503-230-5400).

Written comments or requests for a public hearing should be submitted to the Chief, Environmental and Technical Services Division, Portland.

SUPPLEMENTARY INFORMATION: WDFW and ODFW request modifications to permits under the authority of section 10 of the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531-1543) and the NMFS regulations governing ESA-listed fish and wildlife permits (50 CFR parts 217-227).

Permit 848 (P507D) authorizes WDFW takes of adult and juvenile, threatened, Snake River spring/summer chinook salmon (*Oncorhynchus tshawytscha*) associated with a supplementation hatchery program and scientific research/monitoring. For modification 6 to permit 848, WDFW requests takes of juvenile, threatened, Snake River fall chinook salmon (*Oncorhynchus tshawytscha*) associated with scientific research designed to answer questions on fall chinook salmon production in

the lower Tucannon River. ESA-listed fish are proposed to be captured, handled, and released; captured, marked with fin clips or tagged with passive integrated transponders, transported, and released; or captured and sacrificed for genetic analysis or pathologic studies. An indirect mortality of ESA-listed juvenile salmon associated with the research is requested. Also for modification 6, WDFW requests to return adult, ESA-listed, Snake River spring/summer chinook salmon carcasses from the supplementation program back to the Tucannon River for nutrient enrichment. Modification 6 is requested for the duration of the permit. Permit 848 expires on March 31, 1998.

Permit 1011 (P211J) authorizes ODFW takes of juvenile, threatened, Snake River spring/summer chinook salmon (*Oncorhynchus tshawytscha*) associated with a captive broodstock program for Catherine Creek, upper Grande Ronde River, and Lostine River populations. For modification 1 to permit 1011, ODFW requests to collect a percentage of the returning adult, ESA-listed, naturally-produced fish from these watersheds in 1997 to begin a supplementation program. ODFW anticipates sufficient adult returns to these watersheds in 1997 to allow the collection of ESA-listed adults for hatchery broodstock. ODFW proposes to transport the collected adults to Lookingglass Hatchery where they will be spawned, the resulting eggs incubated, and the juveniles reared. ODFW believes that the collection of ESA-listed adults for hatchery supplementation will increase the probability of the persistence of the populations because of the survival advantage provided by the hatchery. Releases of fish from the supplementation program is not requested at this time. ODFW will request a modification to permit 1011 for authorization to release fish prior to any fish releases. The future request for a modification to the permit will include a detailed plan on proposed fish releases and a plan for the disposition of any excess hatchery fish. The collection of ESA-listed adults for broodstock is proposed for 1997 only. The incubation of eggs and the rearing of ESA-listed juveniles is requested for the duration of the permit. Permit 1011 expires on December 31, 2000.

Those individuals requesting a hearing on either of these permit modification requests should set out the specific reasons why a hearing would be appropriate (see **ADDRESSES**). The holding of such a hearing is at the discretion of the Assistant

Administrator for Fisheries, NOAA. All statements and opinions contained in the above application summaries are those of the applicants and do not necessarily reflect the views of NMFS.
