

Park Service will be joined by the Bureau of Land Management and the U.S. Fish and Wildlife Service as cooperating agencies in the DEIS/RP process. All three agencies will collaborate in identifying and analyzing alternative means for accomplishing cable removal while providing for resource protection and restoration, and minimizing disturbance to visitors, users, and operations. As a conceptual framework for formulating these alternatives, the purposes of the Federal lands managed will be identified and contrasted. Other key elements to be addressed include: project-associated cultural and natural resources, visitor patterns and experiences, authorized users, access and management facilities, and available recovery and remediation techniques.
