

requires EPA to develop a small government agency plan. This rule contains no regulatory requirements that might significantly or uniquely affect small governments. The Agency recognizes that although small governments may own and/or operate USTs, they are already subject to the regulatory requirements under existing District law which are being authorized by EPA, and, thus, are not subject to any additional significant or unique requirements by virtue of this program approval.

#### **Certification Under the Regulatory Flexibility Act**

EPA has determined that this authorization will not have a significant economic impact on a substantial number of small entities. Such small entities which own and/or operate USTs are already subject to the regulatory requirements under existing State law which are being authorized by EPA. EPA's authorization does not impose any additional burdens on these small entities. This is because EPA's authorization would simply result in an administrative change, rather than a change in the substantive requirements imposed on these small entities.

Therefore, EPA provides the following certification under the Regulatory Flexibility Act, as amended by the Small Business Regulatory Enforcement Fairness Act. Pursuant to the provision at 5 U.S.C. 605(b), I hereby certify that this authorization will not have a significant economic impact on a substantial number of small entities. This authorization approves regulatory requirements under existing District law to which small entities are already subject. It does not impose any new burdens on small entities. This proposed rule, therefore, does not require a regulatory flexibility analysis.
