

DEPARTMENT OF ENERGY

Office of Hearings and Appeals

Notice of Cases Filed; Week of February 3 Through February 7, 1997

During the Week of February 3 through February 7, 1997, the appeals,

applications, petitions or other requests listed in this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Any person who will be aggrieved by the DOE action sought in any of these cases may file written comments on the application within ten days of publication of this Notice or the date of

receipt of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585-0107.

Dated: March 3, 1997.

George B. Breznay,

Director, Office of Hearings and Appeals.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of February 3 through February 7, 1997]

Western Area Power Administration

[DOE/EIS-0232]

Record of Decision for the Sierra Nevada Customer Service Region 2004 Power Marketing Program

AGENCY: Western Area Power Administration, DOE.

ACTION: Record of Decision.

SUMMARY: The Department of Energy (DOE), Western Area Power Administration (Western), has decided to develop and implement a marketing

program for marketing Federal electric power resources from the Central Valley Project (CVP) after year 2004 that is within the range of the actions defined in Western's preferred alternative described in the 2004 Power Marketing Program Final Environmental Impact Statement (final 2004 EIS). In making this decision, Western has considered all comments received on its alternatives and the analysis contained in the 2004 Power Marketing Program Draft and Final Environmental Impact Statements (2004 EIS) issued for the project (DOE/EIS-0232) in May 1996 and March 1997, respectively. The program for marketing Federal electric power resources from the CVP is being developed through a public process now underway pursuant to the

Administrative Procedure Act (APA). Although the marketing of Federal power from the Washoe Project (Washoe) may change, operations of Stampede Reservoir and generating facilities will not, so no environmental effects are expected from marketing program changes at this facility.

Western's 2004 EIS evaluated alternatives that cover the reasonable range of options for marketing CVP and Washoe power. The analyses of the environmental effects of these alternatives bracket the greatest possible range of potential impacts which could occur. The 2004 Power Marketing Program Draft Environmental Impact Statement (draft 2004 EIS) analyzed four alternatives: (1) no action (continue present approach of marketing CVP
