Type of Meeting: The forums are open to the public.

Purpose: In our efforts to make it easier and simpler for our customers to deal with us, we are seeking new ways to interact with the public. SSA seeks the public's views on how the agency can provide electronic services to the public through the Internet while protecting the privacy of individual information in our records.

Social Security is committed to providing timely and quality service to its customers, while safeguarding individual privacy. To help meet these commitments, SSA's business plan includes the testing and implementation of secure electronic services directly to the public on networks such as the Internet. Over the past year, SSA has initiated several important Internet test services. One of these tests allows individuals to request and receive their Personal Earnings and Benefit Estimate Statement (PEBES) using an online, interactive process at the Social Security Administration Internet server, Social Security Online (<http://www.ssa.gov>).

PEBES information includes a year-by-year display of an individual's earnings covered by Social Security and Medicare; the Social Security taxes paid, and an estimate of retirement, survivors, and disability benefits. The PEBES does not include current year earnings, employer information, or any information that could reveal the whereabouts of an individual.

Nothing is more important to Social Security than maintaining the public's
