

CPSD tiger beetle habitat and its populations were identified (59 FR 47293). The Conservation Agreement provides conservation measures to adequately address each of those factors. The Conservation Agreement focuses on the following goals: (1) Permanently protect CPSD tiger beetle habitat in two designated conservation areas within the historical range of the species. (2) Establish a continuing management program that educates and enforces CPSD tiger beetle conservation measures within the Coral Pink Sand Dunes. (3) Monitor the CPSD tiger beetle population to demonstrate those conservation measures taken for the species are maintaining it at viable population levels. (4) Gain additional biological and ecological information concerning the beetle and its dune habitat. (5) Form a conservation advisory committee to coordinate all conservation actions and to act as an information gathering and dissemination center. (6) Provide for both motorized and non-motorized recreation within the Coral Pink Sand Dunes consistent with the conservation of the CPSD tiger beetle.

The Conservation Agreement will provide for the recovery of the CPSD tiger beetle by establishing a framework for cooperation and coordination among all involved parties. It will also establish a frame work for conservation efforts, setting recovery priorities, and establishing costs and responsibilities of the various tasks necessary to accomplish the recovery priorities.
