#### Cinergy Services, Inc.; Notice of Filing

May 5, 1997.

Take notice that on April 16, 1997, Cinergy Services, Inc. (Cinergy) tendered for filing a service agreement under Cinergy's Open Access Transmission Service Tariff (the Tariff) entered into between Cinergy and Western Resources (Western).

Cinergy and Western are requesting an effective date of April 15, 1997.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before May 16, 1997. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

#### Cleveland Electric Illuminating Company; Notice of Filing

May 5, 1997.

Take notice that on April 14, 1997, The Cleveland Electric Illuminating Company filed pursuant to Section 205 of the Federal Power Act and the Commission's regulations thereunder an original and six copies of an amendment to the interconnection agreement (Agreement) between CEI and the City of Cleveland (City). This filing is being made for the purpose of complying with the Commission's unbundling requirements without raising rates or charges to the City. CEI states that it has mailed a copy of its filing upon the City. The proposed effective date under the Service Agreements is January 1, 1997.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before May 13, 1997. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. CP97-420-000]

#### CNG Transmission Corporation; Notice of Request Under Blanket Authorization

May 5, 1997.

Take notice that on April 30, 1997, CNG Transmission Corporation (CNG), 445 West Main Street, Clarksburg, West Virginia 26301, filed in the above docket, a request pursuant to Sections 157.205, and 157.208 of the

Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 157.208) for authorization to convert four (4) observation wells to storage wells. This work will include the installation of 4 new storage pipelines and appurtenant facilities to be located at the Oakford Station located in Westmoreland County, Pennsylvania. CNG jointly owns the Oakford Station with Texas Eastern Transmission Corporation, however, CNG is the operator of the Oakford Station. The facilities will allow CNG and Texas Eastern to recover gas that has migrated from the Oakford storage pool, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

CNG requests authorization to convert four existing observation wells, JW-253, JW-283, JW-284, and JW-285, to storage withdrawal wells. CNG states that the connection of these wells for withdrawal purposes only, will allow for CNG to more effectively and efficiently operate the reservoir by the recycling of migrated gas from currently isolated areas of the reservoir in which these wells are located. CNG states that the recycling of this gas will allow CNG to maintain the certificated capacity and deliverability of the Oakford storage pool. The maximum daily design capacity from construction of the pipelines to the observation wells is 85 MMcf per day. The maximum operating pressures for each of the pipelines is 555 PSIG. The proposed facilities and service are not prohibited by CNG's existing tariff.

CNG states that this project will require the construction of the following pipelines to connect the observation wells to existing gathering lines:

1. 1,643' of 6" pipe (0.280 wall) to be known as Line JP-298 for the conversion of well number JW-284,
2. 263' of 6" pipe (0.280 wall) to be known as Line JP-299 for the conversion of well number JW-283,
3. 1,200' of 6" pipe (0.280 wall) to be known as Line JP-301 for the conversion of well number JW-253, and
4. 1,524' of 8" pipe (0.280 wall) to be known as Line JP-300 for the conversion of well number JW-285.

CNG states that the approximate cost of the facilities is \$292,000. CNG indicates that it will continue to operate the Oakford storage pool. CNG further states that there will be no appreciable impact on its current system rates. The proposed facilities and service are not prohibited by CNG's existing tariff.

CNG states that the effect on its peak and annual delivery obligations is minimal; this project will pose no detriment to its firm service to any other
