

The effect of this determination is that Calgene's cotton events 31807 and 31808 are no longer considered regulated articles under APHIS' regulations in 7 CFR part 340. Therefore, the requirements pertaining to regulated articles under those regulations no longer apply to the field testing, importation, or interstate movement of the subject cotton lines or their progeny. However, importation of cotton events 31807 and 31808 or seeds capable of propagation are still subject to the restrictions found in APHIS' foreign quarantine notices in 7 CFR part 319.

National Environmental Policy Act

An environmental assessment (EA) has been prepared to examine the potential environmental impacts associated with this determination. The EA was prepared in accordance with: (1) The National Environmental Policy Act of 1969, as amended (NEPA)(42 U.S.C. 4321 *et seq.*); (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500-1508); (3) USDA regulations implementing NEPA (7 CFR part 1b); and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372). Based on that EA, APHIS has reached a finding of no significant impact (FONSI) with regard to its determination that Calgene's cotton events 31807 and 31808 and lines developed from them are no longer regulated articles under its regulations in 7 CFR part 340. Copies of the EA and the FONSI are available upon request from the individual listed under **FOR FURTHER INFORMATION CONTACT**.

Sweet Lake/Willow Lake Project (CS-11b), Cameron Parish, LA

AGENCY: Natural Resources Conservation Service.

ACTION: Notice of finding of no significant impact.

Description of Action

The United States Department of Agriculture, Natural Resources Conservation Service proposes to implement the Sweet Lake/Willow Lake Restoration Plan in Cameron Parish, Louisiana. The project involves placement of a rock rip-rap embankment of approximately 18,000 linear feet along the north bank of the Gulf Intracoastal Waterway (GIWW), vegetative plantings of California bulrush (*Scirpus californicus*) along approximately 28,300 linear feet of the Sweet Lake shoreline, and construction of approximately 25,500 linear feet of earthen terrace with 2 rows of California bulrush plantings.

Factors Considered in Determination

The Sweet Lake/Willow Lake Environmental Assessment was prepared in order to assess potential impacts of the project. In this document, no significant adverse impacts to important habitat, endangered species, recreation, or other resources were found. The project will not affect the two archaeological sites, and no other known National Register of Historic Places properties are in the vicinity of the project area. Impacts to any significant cultural resources in the area will be avoided.

Public Participation

Upon signature of this Finding of No Significant Impact (FONSI), a Notice of Availability will be sent to concerned federal, state, local and other organizations and individuals known to have an interest in the proposed project. The proposed project has been coordinated with the U.S. Fish and Wildlife Service, National Marine Fisheries Service, Environmental Protection Agency, U.S. Army Corps of Engineers, Louisiana Department of Natural Resources and the Governor's Office of Coastal Affairs.

Meetings are being held throughout the process to keep all interested parties informed of the project status. Agency consultation and public participation to date have shown no unresolved conflicts with the proposed implementation of the selected plan.

Conclusion

This office has assessed the environmental impact of the proposed work and has determined that the project will have no significant adverse local, regional, or national impacts on the environment. Therefore, no Environmental Impact Statement (EIS) or Supplemental EIS will be prepared.

Dated: May 8, 1997.
