

1. Qualifications and experience of the applicant relative to the proposed project.

- Does the applicant demonstrate experience in the field of the proposed activity?

- Does the applicant have the properly trained staff, facilities, or infrastructure in place to conduct the project?

2. Consistency of applicant's proposed project with the risk reduction goals of the PESP.

3. Provision for measuring and documenting the project's results quantitatively and qualitatively (evaluation).

- Is the project designed in such a way that it is possible to measure and document the results quantitatively and qualitatively?

- Does the applicant identify the method that will be used to measure and document the project's results quantitatively and qualitatively?

- Will the project assess or suggest a new means of measuring progress in reducing risk/use of pesticides in the United States.

4. Likelihood that the project can be replicated in other areas by other organizations to benefit other communities or that the product may have broad utility to a widespread audience. Can this project, taking into account typical staff and financial restraints, be replicated by similar organizations in different locations to address a problem that exists in other communities?
