

videos and rebroadcasting of U.S. satellite-carried programming. During the Caribbean Basin Initiative designation process in the mid-1980's the Government of Honduras was officially informed of this problem and gave assurances that it would be resolved. This has not happened. Three major television stations, one in Tegucigalpa and two in San Pedro Sula, are the major offenders at present. Other piracy in Honduras affects our sound recording and book publishing industries.

As a result, the Trade Policy Staff Committee (TPSC) will recommend to the President that he partially withdraw duty-free treatment accorded Honduras under the Generalized System of Preferences (GSP) program and the Caribbean Basin Initiative (CBI). Specifically, the TPSC will recommend that \$5 million in combined GSP and CBI trade benefits be withdrawn. These benefits will be suspended in four months if the intellectual property rights problems are not remedied. The public will be given an opportunity to comment on the specific products to be affected.
