

Implementation Plan (SIP) revision request submitted by Indiana on August 26, 1996, which requires oxides of nitrogen (NO<sub>x</sub>) Reasonably Available Control Technology (RACT) for portland cement kilns, electric utility boilers, and industrial, commercial, or institutional (ICI) boilers in Clark and Floyd Counties. In addition, EPA is proposing to approve on April 30, 1997, negative declaration from Indiana certifying that, to the best of the State's knowledge, there are no remaining major sources of NO<sub>x</sub> in Clark and Floyd Counties which need RACT rules. In the final rules section of this **Federal Register**, the EPA is approving this action as a direct final rule without prior proposal because EPA views this as a noncontroversial action and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to that direct final rule, no further activity is contemplated in relation to this proposed rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on the proposed rule. Any parties interested in commenting on this document should do so at this time.
