

Telecommunications Act of 1996 (1996 Act). Performance guideline #4, prohibiting carrier's reliance on other carriers' databases, facilities or services is being deleted. QOR violates guideline #6. Limited extensions for deployment of Phase I and II are granted. Deployment is limited to request switches, etc. The information collected by the Commission under the field test report requirement will be used by the Commission to evaluate the implementation of long-term number portability measures and to safeguard the reliability of the public switched network. The specific request requirements will serve to trigger the obligation of LECs to provide long-term number portability. The requirement that states notify the Commission of their intention to opt out of the regional database system will assist the Commission in monitoring the nationwide implementation of number portability. The option for states to aggregate switch requests in the top 100 MSAs will also enable the states and Commission to monitor nationwide implementation. The requirement that any administrator selected prior to the *First Report and Order's* release must submit a new proposal to administer other databases ensures that such proposals conform with the requirements specified by the NANC, consistent with the principles enunciated by the Commission in the *First Report and Order*. Petitions to extend implementation deadlines will be used by the Commission to determine whether circumstances exist which warrant extension of any of the deadlines announced by the Commission in the *First Report and Order*. The list of switches for which portability has been requested as required by the *First Memorandum Opinion and Order on Reconsideration* in the top 100 MSAs will enable the Commission, states and carriers to monitor implementation of nationwide number portability.

Federal Communications Commission.

Acting Secretary.
